Document<del>/Plan</del> to be Certified: Monthly EM&A Report for October 2025

Date: 13 November 2025

#### **Reference EP Condition**

Environmental Permit Condition: Condition 3.4

The Permit Holder shall submit 1 hard copy and 1 electronic copy of Monthly EM&A Reports for the construction stage of the Project to the Director, within 10 working days after the end of the reporting month. The submissions shall be certified by the ET Leader and verified by the IEC as having complied with the requirements as set out in the EM&A Manual before submission to the Director. Additional copies of the Monthly EM&A Reports shall be provided upon request by the Director.

#### **ET Certification**

I hereby certify that the above referenced document/plan complies with the above referenced condition of EP-640/2024.

# **EXECUTIVE SUMMARY**

ND/2024/10

This is the Monthly Environmental Monitoring and Audit (EM&A) Report presenting the EM&A works during the period of October 2025 for the San Tin Technopole Phase 1 Development (the Project) in accordance with the EM&A Manual. Two (2) works contracts, Package 1 Contract 1 (ND/2024/09) and Package 2 Contract 1 (ND/2024/10), are active in this reporting period.

- The construction of ND/2024/09 commenced on 29 September 2025; and
- The construction of ND/2024/10 commenced on 18 September 2025.

A summary of EM&A activities conducted in the reporting period is listed below:

Air Quality Monitoring	Continuous impact monitoring	
Noise Monitoring		
• ND/2024/09	4 sessions	
• ND/2024/10	4 sessions	
Water Quality Monitoring		
• ND/2024/09	13 sessions	
• ND/2024/10	13 sessions	
Environmental Site Inspection		
• ND/2024/09	4 sessions	

Environmental site audits, including weekly site inspections of construction works by representatives from ET, Engineer and Contractor; and joint site inspection with Independent Environmental Checker (IEC) were conducted during the reporting period. Based on the audit results and the observation for the reporting period, environmental pollution control and mitigation measures for the Project were properly implemented.

5 sessions

# BREACHES OF ACTION AND LIMIT LEVELS FOR AIR QUALITY

One (1) Action Level exceedance was recorded for impact air quality monitoring in the reporting period. Relevant investigation and follow-up action were conducted according to the EM&A programme. The exceedance was considered not related to the Project after investigation.

# BREACHES OF ACTION AND LIMIT LEVELS FOR NOISE

No exceedance of Action and Limit Levels was recorded for impact noise monitoring in the reporting period.

# BREACHES OF ACTION AND LIMIT LEVELS FOR WATER QUALITY

Two (2) Limit Level exceedances were recorded for impact water quality monitoring in the reporting period. Relevant investigations and follow-up actions were conducted according to the EM&A programme. The exceedances were considered not related to the Project after investigation.

# ENVIRONMENTAL COMPLAINTS, NON-COMPLIANCE & SUMMONS

There was no environmental complaint, notification of summons or prosecution recorded in the reporting period.

#### REPORTING CHANGE

There was no reporting change in the reporting period.

#### KEY ISSUES FOR THE NEXT THREE MONTHS

Potential environmental impacts arising from the upcoming construction activities in the next three months are mainly associated with dust emission, noise from plant operation, handling and storage of C&D materials generated from construction activities, efficiency of wastewater and drainage management and tree protection. The ET will keep track on the construction works to confirm compliance with environmental requirements and the proper implementation of all necessary mitigation measures.

# 1. INTRODUCTION

## 1.1 BACKGROUND

San Tin Technopole Phase 1 Development ("the Project") mainly covers innovation & technology (I&T) land parcels to the north of San Tin Highway/Fanling Highway, some residential land to the south and the key infrastructure areas with road connections. The construction of the Project will be delivered under various works contracts and its scope of works comprises the following elements:

- Site formation of land for innovation and technology development, housing, community, commercial and other developments;
- Engineering infrastructure works including but not limited to roadworks, drainage, sewerage, waterworks, pumping stations, fresh water and flushing water service reservoirs, Common Utility Tunnel (CUT) and other associated buildings / structures / E&M systems for the Project; and
- Landscaping works;

The Environmental Impact Assessment (EIA) Report for the San Tin/Lok Ma Chau Development Node (STLMC DN) (Register No. AEIAR-261/2024) was approved on 17 May 2024. Two (2) works contracts, ND/2024/09 and ND/2024/10, are active in this reporting period. The construction of ND/2024/09 commenced on 29 September 2025, and the construction of ND/2024/10 commenced on 18 September 2025. The location of the Project, including the associated works areas of each active works contract is shown in **Figure 1.1**. The relevant Environmental Permits (EPs) under the Project and the respective works contracts are summarized in **Table 1.1**.

TABLE 1.1 SUMMARY OF ENVIRONMENTAL PERMITS UNDER THE PROJECT AND THE RESPECTIVE ACTIVE WORKS CONTRACTS

	Ma Chau Development Node		

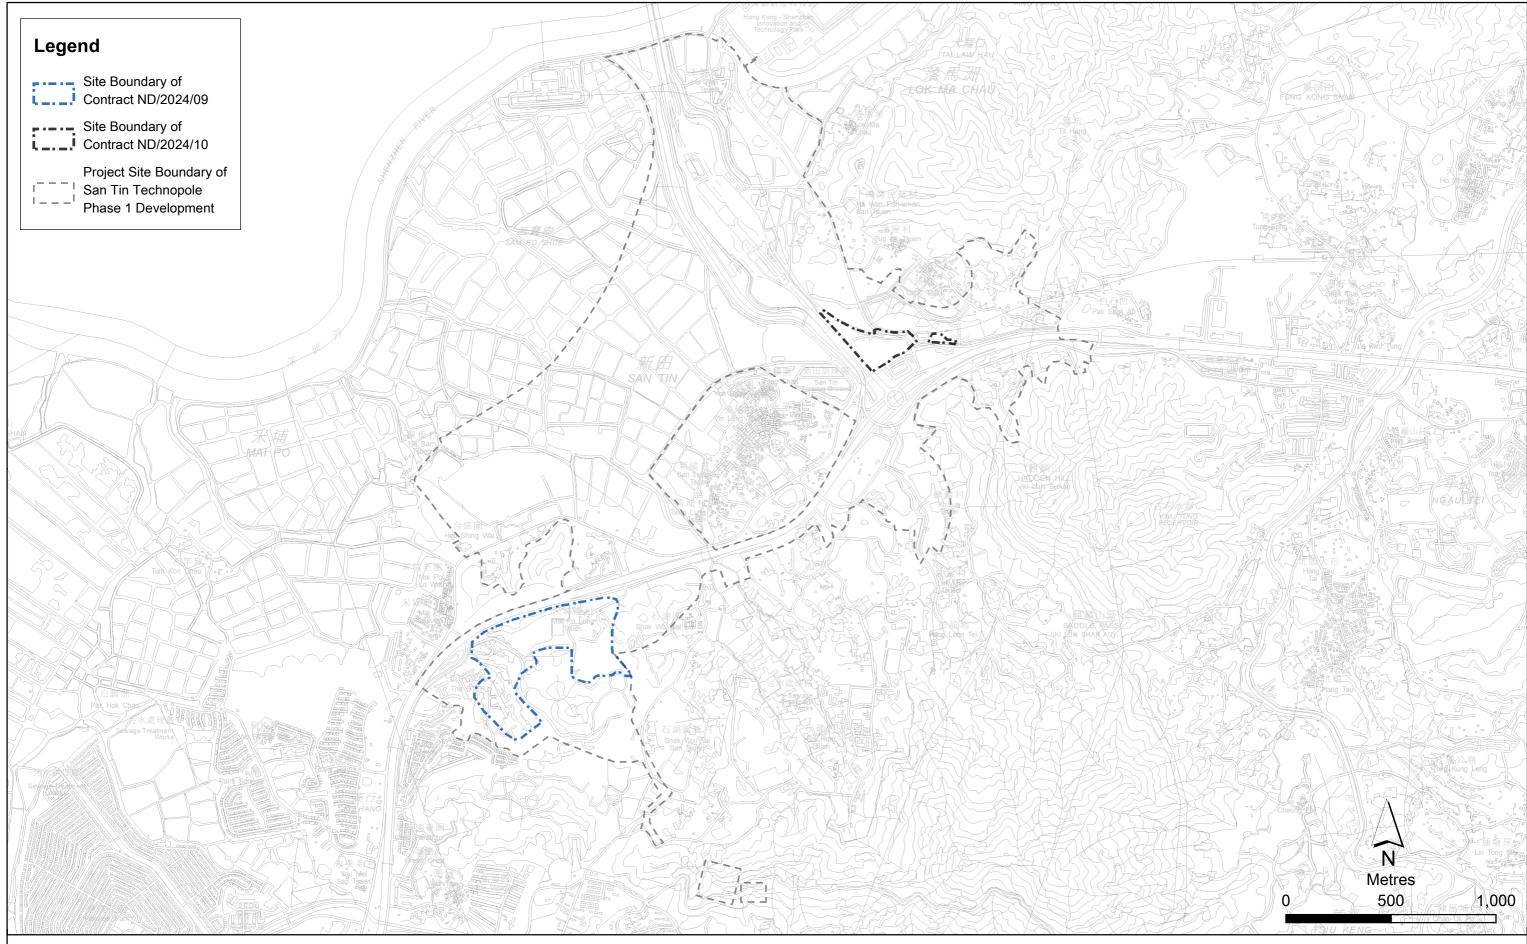

Figure 1.1

Location of Project

ERM-Hong Kong, Limited (ERM) is commissioned to undertake the role of Environmental Team (ET) for the Project in accordance with the requirements specified in the Environmental Permit(s), the Environmental Monitoring and Audit (EM&A) Manual, the EIA Report of the STLMC DN project and other relevant statutory requirements.

## 1.2 SCOPE OF THE EM&A REPORT

This is the Monthly EM&A Report for the Project which summarises the key findings of the EM&A programme during the reporting period of October 2025.

# 1.3 ORGANISATION STRUCTURE

The organisation structure of the Project is shown in **Annex A**. The key personnel contact names and details are summarised in **Table 1.2** below.

TABLE 1.2 CONTACT INFORMATION OF KEY PERSONNEL

Party	Position	Name	Telephone
Environmental Team (ET)	ET Leader	Terence Fong	2271 3156
(ERM-Hong Kong, Limited)	ET Leader Representative	Harris Wong	2271 3182

	discharge of surface runoff	wastewater and drainage	
	Tree protection	management	
	·	Retain and protect all existing	
		trees and vegetation within	
		the study area which are not	
		directly affected by the works	
Contract No. ND/2024/10			
Ground Investigation	Dust emission	Good site practices	
Work	Handling and storage of	<ul> <li>Regular water spraying on</li> </ul>	
Construction for Box	C&D materials		
		stockpiles	
Culvert	Noise from use of PME	Provide tarpaulin sheets	
Tree Felling	Emission of dark smoke	coverage on stockpiles and	
	from PMEs		

- Proper discharge of wastewater
- Prevention and proper discharge of surface runoff
- Tree protection

- reuse of C&D materials as far as practicable
- Use of Quality Powered Mechanical Equipment (QPME) and noise barrier/acoustic mat/enclosure
- Regular maintenance of PMEs
- Implementation of wastewater and drainage management
- Retain and protect all existing trees and vegetation within the study area which are not directly affected by the works

# 1.5 SUMMARY OF EM&A PROGRAMME REQUIREMENTS

The status for all environmental aspects is presented in **Table 1.4**. The EM&A programme requirements remained unchanged during the reporting period.

TABLE 1.4 SUMMARY OF STATUS FOR THE ENVIRONMENTAL ASPECTS UNDER THE EM&A MANUAL

Parameters	Status
Air Quality	
Impact Monitoring	On-going for Contract Nos. ND/2024/09 and
	ND/2024/10, monitoring conducted continuously
Noise	
Baseline Monitoring	The results of baseline noise monitoring for
	Contract Nos. ND/2024/09 and ND/2024/10
	were reported in Baseline Monitoring Report and
	submitted to EPD under the EM&A Manual
	Section 16.3 and EP Condition 3.3.
Impact Monitoring	On-going for Contract Nos. ND/2024/09 and
	ND/2024/10, monitoring conducted once per
	week
Water Quality	
Baseline Monitoring	The results of baseline water quality monitoring
	for Contract Nos. ND/2024/09 and ND/2024/10
	were reported in Baseline Monitoring Report and
	submitted to EPD under the EM&A Manual
	Section 16.3 and EP Condition 3.3.

Impact Monitoring	On-going for Contract Nos. ND/2024/09 and ND/2024/10, monitoring conducted 3 days per week
Waste Management	
Waste Monitoring	On-going
Land Contamination	
Contamination Assessment Plan (CAP),	On-going
Remediation Action Plan (RAP) and	
Remediation Report (RR)	
Ecology	
Wetland Compensation Monitoring	To be conducted when construction activities occur within 400m from the contiguous pond / wetland habitats on the northern portion of the
Night Roost Monitoring	Project area.  Pre-construction Night Roost Survey commenced in September 2025 and on-going at the original
	roosting sites until commencement of tree felling works.  Upon the completion of re-provision of roosting
	substratum, night roost monitoring to be conducted monthly during dry season at the reprovision site.
Egretry Monitoring	To be conducted monthly during breeding season (between March and early September).
Flight Corridor Monitoring	To be conducted when construction activities occur within this flight corridor.
Woodland Compensation Monitoring	To be conducted after completion of compensatory planting.
Post-transplantation / Post-seedling Planting	To be conducted after the transplantation /
Monitoring of Flora Species of Conservation Importance	seedling planting.
Post-translocation Monitoring of Fauna Species of Conservation Importance	To be conducted after the translocation.
Pre-construction Site Check and Nest Control	To be conducted in breeding season (March to July). The associated nest control measures to be conducted in non-breeding season (August to February) after pre-construction survey.
Pre-construction Site Check for Eurasian Otter	To be conducted prior to the commencement of construction activities.
Wildlife Corridor Monitoring	To be conducted upon establishment of the wildlife corridors.

Site Environmental Audit	
Regular Site Inspection	On-going
Environmental Log Book	On-going

Taking into account the construction works, impact monitoring of air quality, noise, water quality and waste management were carried out in the reporting period. The monitoring schedule of noise and water quality are provided in **Annex E2** and **Annex F2** respectively.

The EM&A programme also involved environmental site inspections and related auditing conducted by the ET for checking the implementation of the required environmental mitigation measures recommended in the approved EIA Report and relevant EP submissions. The relevant EP submissions are listed in **Annex J**.

# 1.6 STATUS OF OTHER STATUTORY ENVIRONMENTAL REQUIREMENT

The environmental licenses and permits, including EP, discharge license under Water Pollution Control Ordinance, registration as chemical waste producer, construction noise permit and specified processes license, which were valid in the reporting period are presented in **Annex C**. No non-compliance with environmental statutory requirements was recorded.

# MONITORING RESULTS

# 2.1 AIR QUALITY MONITORING

# 2.1.1 MONITORING REQUIREMENTS AND EQUIPMENT

According to the EM&A Manual of the Project, impact air quality monitoring in terms of 1-hour average Respirable Suspended Particulate (RSP), 24-hour rolling average RSP and 24-hour rolling average Fine Suspended Particulate (FSP) concentrations, was conducted continuously with air sensors. The results of these monitoring parameters are compared with the corresponding Action and Limit levels listed in **Table 2.1**.

TABLE 2.1 ACTION AND LIMIT LEVELS FOR AIR QUALITY (DUST)

Parameter	Action Level	Limit Level
1-hour RSP	150 μg/m <sup>3</sup>	Not applicable
24-hour RSP (rolling average)	Not applicable	100 μg/m³
24-hour FSP (rolling average)	Not applicable	50 μg/m <sup>3</sup>

The monitoring locations and air sensors used in the continuous impact air quality monitoring are summarised in **Table 2.2** and illustrated in **Figure 2.1**. Copies of the calibration certificates for the onsite air sensors at the monitoring stations and the transfer standards are presented in **Annex D1** and **Annex D2** respectively.

TABLE 2.2 AIR QUALITY MONITORING DETAILS

Monitoring Station	Relevancy to Works Contract	Location	Equipment

Monitoring	Average (µg/m³)	Range (µg/m³)	Action Level	Limit Level
Station			(µg/m³)	(µg/m³)
M03	8.7	3.2 - 20.2	Not applicable	50
M04	12.2	4.1 - 24.0	Not applicable	50
M06	11.9	3.9 - 23.2	Not applicable	50
M09	10.2	3.8 - 22.2	Not applicable	50
M11	12.1	5.1 - 26.1	Not applicable	50
M13	10.8	3.4 - 21.8	Not applicable	50

Monitoring	Average (µg/m³)	Range (µg/m³)	Action Level	Limit Level
Station			(µg/m³)	(µg/m³)
M14	10.7	3.1 - 21.9	Not applicable	50
M15a	13.5	3.7 - 25.8	Not applicable	50

One (1) Action Level exceedance was recorded for impact air quality monitoring in the reporting period. Investigation on the exceedance was conducted and summarised in **Table 2.6** below. No Project-related exceedance was recorded after investigation. No further action is therefore required to be undertaken in accordance with the Event and Action Plan presented in **Annex D5**.

TABLE 2.6 DETAILS OF EXCEEDANCES RECORDED FOR AIR QUALITY MONITORING

Date	Monitoring Station	Parameter	Exceedance Level	No. of exceedance(s)	Time period	Remarks
21 October 2025	M11	1-hour RSP	Action Level	1	18:00- 18:59	The exceedance was unlikely caused by the construction of the Project as no construction activity under ND/2024/09 was carried out and mitigation measures for air quality were implemented properly during the monitoring period.

# 2.2 NOISE MONITORING

# 2.2.1 MONITORING REQUIREMENTS AND EQUIPMENT

According to the EM&A Manual of the Project, noise impact monitoring was conducted once per week during the construction phase of the Project. The Action and Limit Levels for construction noise of the Project are provided in **Table 2.7** below.

TABLE 2.7 ACTION AND LIMIT LEVELS FOR CONSTRUCTION NOISE

Time Period	Action Level	Limit Level
0700 - 1900 hours on normal	When one documented complaint is received	75 dB(A) <sup>(a),(b)</sup>
weekdays		

#### Note:

- (a) If works are to be carried out during restricted hours, the conditions stipulated in the Construction Noise Permit (CNP) issued by the Noise Control Authority have to be followed.
- (b) 70 dB(A) and 65 dB(A) for schools during normal teaching periods and school examination periods, respectively.

Noise monitoring was performed using sound level meter at the designated monitoring stations provided in **Table 2.8** and **Figure 2.2**, in accordance with the requirements stipulated in the

EM&A Manual. Acoustic calibrator was deployed to check the sound level meters at a known sound pressure level. Details of the deployed equipment are provided in **Table 2.8**. Copies of the calibration certificates for the equipment are presented in **Annex E1**.

TABLE 2.8 NOISE MONITORING DETAILS

Monitoring Station	Relevancy to Works Contract	Location	Parameter and Frequency	Monitoring Dates	Equipment	Type of Measurement

# 2.2.2 MONITORING SCHEDULE FOR THE REPORTING MONTH

The schedule for noise monitoring during the reporting period is provided in **Annex E2**.

#### 2.2.3 RESULTS AND OBSERVATIONS

Results for noise monitoring are summarised in **Table 2.9**. Major noise sources during the noise monitoring included noise from use of Powered Mechanical Equipment (PME) due to pile wall construction, tree felling, demolition and site formation works. The monitoring data and the graphical presentation are provided in **Annex E3**.

TABLE 2.9 SUMMARY OF CONSTRUCTION NOISE MONITORING RESULTS IN THE REPORTING PERIOD

Monitoring Station	Average, dB(A), L <sub>eq (30 min)</sub>	Range, dB(A), L <sub>eq (30 min)</sub>	Limit Level, dB(A), L <sub>eq (30 min)</sub>
CM1 <sup>(a)</sup>	69.6	68.6 - 70.6	75
CM3 <sup>(a)</sup>	53.3	49.3 - 54.8	75

Figure 2.2

Locations of Noise Monitoring Stations

<b>Monitoring Station</b>	Average, dB(A),	Range, dB(A),	Limit Level, dB(A),
	L <sub>eq</sub> (30 min)	L <sub>eq</sub> (30 min)	L <sub>eq</sub> (30 min)
CM4	47.0	41.7 - 50.2	75
CM9 (a)	64.7	64.1 - 65.4	75
CM10 (a)	57.7	54.2 - 60.4	75
CM11 <sup>(a)</sup>	53.2	52.5 - 54.4	75

#### Note(s):

(a) A correction of +3 dB(A) was made to the free field measurements.

No exceedance of Action and Limit Levels was recorded for construction noise monitoring in the reporting period. No action was thus required to be undertaken in accordance with the Event and Action Plan presented in **Annex E4**.

# 2.3 WATER QUALITY MONITORING

# 2.3.1 MONITORING REQUIREMENTS AND EQUIPMENT

Water quality impact monitoring was carried out to ensure that any deterioration of water quality was detected, and that timely action was taken to rectify the situation if the deterioration of water quality is caused by the Project. Impact water quality monitoring was undertaken three days per week during the reporting period in accordance with the EM&A Manual. Each water quality impact monitoring was scheduled such that the interval between two water quality impact monitoring was more than 36 hours to record representative water quality data throughout the week.

Two (2) replicate in-situ measurements and samples were collected at each monitored water depth of each designated monitoring stations. Dissolved Oxygen (DO), pH value, salinity, temperature and turbidity were measured in-situ whereas the level of suspended solids (SS) were determined by SGS Hong Kong Limited which is a HOKLAS accredited laboratory.

The calculated Action and Limit Levels of water quality monitoring with reference to the Baseline Water Quality Monitoring Report are provided in **Table 2.10**.

TABLE 2.10CALCULATED ACTION AND LIMIT LEVELS FOR WATER QUALITY

Parameter	Action Level	Limit Level		
San Tin Eastern Main Drainage Channel (STEMDC) - Station D1'				
DO in mg/L (a)	1.2 mg/L	1.2 mg/L		
SS in mg/L (b), (c)	105 mg/L, or 120% of upstream	113 mg/L, or 130% of upstream		
	control station's (U1a) SS recorded	control station's (U1a) SS recorded		
	on the same day	on the same day		
Turbidity in NTU (b), (c)	97 NTU, or 120% of upstream	102 NTU, or 130% of upstream		
	control station's (U1a) turbidity	control station's (U1a) turbidity		
	recorded on the same day	recorded on the same day		

San Tin Western Main Drainage Channel (STWMDC) - Stations D2a, D2b', D2c and D2d

Parameter	Action Level	Limit Level
DO in mg/L (a)	1.3 mg/L	1.1 mg/L
SS in mg/L (b), 3	38 mg/L, or 120% of upstream	46 mg/L, or 130% of upstream
	control stations' (U2a and U2b) SS	control stations' (U2a and U2b) SS
	recorded on the same day	recorded on the same day
Turbidity in NTU (b), (c)	42 NTU, or 120% of upstream	52 NTU, or 130% of upstream
	control stations' (U2a and U2b)	control stations' (U2a and U2b)
	turbidity recorded on the same day	turbidity recorded on the same day
Small Watercourses a	long Sam Tam Road - Station D7	
DO in mg/L (a)	0.6 mg/L	0.6 mg/L
SS in mg/L (b)	5 mg/L	5 mg/L
Turbidity in NTU (b)	11 NTU	12 NTU
Small Watercourses n	ear Mai Po Village - Station D8	
DO in mg/L (a)	1.4 mg/L	1.2 mg/L
SS in mg/L (b)	7 mg/L	8 mg/L
Turbidity in NTU (b)	12 NTU	13 NTU

#### Note(s):

- (a) For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.
- (b) For SS and turbidity, non-compliance of the water quality limits occurs when monitoring result is higher than the limits
- (c) For clarity, the exceedance of Action / Limit Levels for SS and turbidity is considered to occur when both the baseline percentile criteria (based on 95%-ile / 99%-ile of collected baseline data) and control station criteria (based on 120% / 130% of control station data collected on the same day during impact monitoring) are exceeded. In case more than one upstream control station is involved, the higher number would be considered as the control criteria. Exceeding either the baseline percentile criteria or control station criteria alone does not constitute the exceedance of the corresponding Action / Limit Levels.

The locations of the monitoring stations under works contracts ND/2024/09 and ND/2024/10 are shown in **Figure 2.3** and **Table 2.11**.

TABLE 2.11 LOCATIONS OF IMPACT WATER QUALITY MONITORING STATIONS AND MONITORING REQUIREMENTS

D8	ND/2024/09	824188	839310	Impact Station			

#### Note(s):

- (a) Alternative water quality monitoring station U1b' is used as fall-back option in case sampling at original monitoring station of U1b as per EM&A Manual is not practical due to low flow condition.
- (b) Alternative water quality monitoring stations D1', D2b' and U2b' have been adopted as replacements of the original stations D1, D2b and U2b as per EM&A Manual due to access limitations.

The equipment used in the impact water quality monitoring work is summarised in **Table 2.12** below. Copies of the calibration certificates are attached in **Annex F1**.

# 2.3.2 MONITORING SCHEDULE FOR THE REPORTING MONTH

The schedule for water quality monitoring during the reporting period is provided in **Annex F2**.

#### 2.3.3 RESULTS AND OBSERVATIONS

A total of twenty-six (26) monitoring events for impact water quality monitoring were conducted at all designated monitoring stations in the reporting period. Impact water quality monitoring results and graphical presentations are provided in **Annex F3**.

Two (2) Limit Level exceedances were recorded for impact water quality monitoring in the reporting period, including one (1) Limit Level for SS and one (1) Limit Level for Turbidity. Investigations on the Limit Level exceedances were conducted and summarised in **Table 2.13** below.

TABLE 2.13 DETAILS OF EXCEEDANCES RECORDED FOR WATER QUALITY MONITORING

Date	Monitoring	Parameter	Exceedance	Remarks
	Station		Level	
2 October 2025	D8	SS	Limit Level	The exceedances were unlikely
10 October 2025	D8	Turbidity	Limit Level	caused by the construction of the
				Project as no construction
				activities that cause potential
				water quality impact were carried
				out near Station D8.

No Project-related exceedances were recorded after investigation. No further action is therefore required to be undertaken in accordance with the Event and Action Plan presented in **Annex F4**.

#### 2.4EM&A SITE INSPECTION

Site inspections were carried out on a weekly basis with the Contractor and ER to monitor the implementation of proper environmental pollution control and mitigation measures for air quality, noise, water quality, waste management, landscape and visual impacts under the Project. In the reporting period, four (4) site inspections were carried out on 8, 14, 22 and 28 October 2025 for ND/2024/09, and five (5) site inspections were carried out on 2, 10, 16, 24 and 28 October 2025 for ND/2024/10.

Key observations during the site inspections are summarized in **Table 2.14**.

TABLE 2.14 KEY OBSERVATIONS IDENTIFIED DURING THE SITE INSPECTION IN THIS REPORTING MONTH

Inspection Date	<b>Environmental Observations</b>	Follow-up Status	
ND/2024/09			
8 October 2025	<ul> <li>Designated area should be assigned for waste storage at Portion 1B.</li> <li>Relevant EP should be displayed at all site entrances/exits.</li> </ul>	<ul> <li>Designated area has been assigned for waste storage at Portion 1B.</li> <li>Relevant EP have been displayed at all site entrances/exits.</li> </ul>	

Inspection Date	<b>Environmental Observations</b>	Follow-up Status
14 October 2025	<ul> <li>Designated area should be assigned for waste disposal/storage at Portion 1D.</li> <li>Drip tray should be placed under the oil container.</li> </ul>	<ul> <li>Designated area has been assigned for waste disposal/storage at Portion 1D.</li> <li>Drip tray has been placed underneath the oil container.</li> </ul>
22 October 2025	Relevant EP should be displayed at the site entrance/exit at San Tin Soccer Pitch.	The Relevant EP has been displayed at the site entrance and exit at San Tin Soccer Pitch.
28 October 2025	The Contractor was reminded to provide wheel washing facility at the site entrance, and to provide bunds to gully to direct runoff to designated treatment facility.	Wheel washing facility has been provided at the site entrance. Bunds to gully have been provided to direct runoff to designated treatment facility.
ND/2024/10		
2 October 2025	<ul> <li>No NRMM label was displayed for the excavator. The contractor was reminded to display NRMM label for the excavator.</li> <li>Water spraying is not provided during breaking works. The contractor was reminded to provide water spraying for breaking works.</li> <li>Noise acoustic wrapping is not provided for the breaker. The contractor was reminded to provide noise acoustic wrapping for the breaker to reduce noise emission from the breaking works.</li> </ul>	<ul> <li>NRMM label has been displayed for the excavator.</li> <li>Water spraying has been provided during breaking works.</li> <li>Noise acoustic wrapping has been provided for the breaker during breaking works.</li> </ul>
10 October 2025	<ul> <li>No particular observation.</li> <li>The contractor was reminded that regular watering should be provided for exposed site surfaces and unpaved roads.</li> </ul>	• N/A
16 October 2025	Accumulation of stockpiles was observed on site. The Contractor was reminded to clear the stockpile regularly or provide coverings for the stockpile.	Stockpile was covered by tarpaulin sheet when idle.
24 October 2025	Breaking works without water spraying was observed on site. The Contractor was reminded to provide water spraying for breaking works.	Water spraying was applied during breaking works.
28 October 2025	Open stockpiles should be covered by tarpaulin sheet.	Stockpile was covered by tarpaulin sheet when idle.

#### 2.5 WASTE MANAGEMENT

Waste generated from the Works Contracts of the Project include inert construction and demolition (C&D) materials and non-inert C&D wastes. Sorting of C&D materials was carried out on site. Sufficient numbers of receptacles were available for general refuse collection and sorting.

Reference has been made to the waste flow tables prepared by the Contractors. The quantities of different types of waste are summarised in **Table 2.15**. Details of cumulative waste management data are presented as a waste flow table in **Annex G**.

# TABLE 2.15 QUANTITIES OF WASTE GENERATED IN REPORTING PERIOD

Month	Contract No.	Inert C&D  Materials (a) (b) (m³)	Imported Fill (c) (m³)	Inert Construction Waste Reused (d) (m³)	Non-inert Construction Waste (e) (tonnes)	Recyclable Materials <sup>(f)</sup> (tonnes)	Chemical Waste (tonnes)
October 2025	ND/2024/09	0.00	0.00	0.00	5.00	0.003	0.00
	ND/2024/10	0.00	0.00	0.00	35.73	0.000	0.00
	Sub-total	0.00	0.00	0.00	40.73	0.003	0.00

#### Note:

- (a) Inert construction wastes include hard rock and large broken concrete, and materials disposed as public fill.
- (b) The conversion factor for inert C&D Materials for ND/2024/10 is 2.4 tonnes/m<sup>3</sup>.
- (c) Imported materials from any source outside of the Project.
- (d) Reuse of inert construction waste generated under the Project.
- (e) Non-inert construction wastes include general refuse disposed at landfill.
- (f) Recyclable materials include metals, paper, cardboard, plastics and others.

CLIENT: Civil Engineering and Development Department
PROJECT NO: 0785165 DATE: 13 November 2025 VERSION: 2

# 2.6 IMPLEMENTATION STATUS OF ENVIRONMENTAL MITIGATION MEASURES

A summary of the Environmental Mitigation Implementation Schedule is presented in **Annex H**. The necessary mitigation measures were implemented properly for the Project.

# 2.7 SUMMARY OF COMPLAINTS, NOTIFICATION OF SUMMONS AND SUCCESSFUL PROSECUTIONS

There was no notification of summons or prosecution recorded in the reporting period.

# 3. FUTURE KEY ISSUES

# 3.1 CONSTRUCTION PROGRAMME FOR THE COMING THREE MONTHS

Works to be undertaken in the next three months are summarised in **Table 3.1** below, together with key issues and the key mitigation measures.

TABLE 3.1 MAJOR CONSTRUCTION WORKS IN THE NEXT THREE MONTHS

Construction Works to be Undertaken	Key Issues	Key Mitigation Measures

The ET will keep track on the construction works to confirm compliance with environmental requirements and the proper implementation of all necessary mitigation measures. The ET will

also recommend to the Contractors about the environmental toolbox topics on the abovementioned key issues for the next reporting period.

# 3.2 MONITORING SCHEDULE FOR THE FUTURE 3 MONTHS

The tentative schedules for environmental monitoring in November, December 2025 and January 2026 are provided in **Annex I**.

# 4. CONCLUSION AND RECOMMENDATIONS

This EM&A Report presents the findings of the EM&A activities undertaken for the Project during the period of October 2025 in accordance with the EM&A Manual and the requirements of the EPs. The environmental monitoring, site inspection, environmental complaint handling and EM&A reporting in works areas under Contract Nos. ND/2024/09 and ND/2024/10 were covered and carried out.

Air quality (1-hour RSP, 24-hour rolling average RSP and 24-hour rolling average FSP), noise and water quality monitoring were carried out in the reporting period.

One (1) Action Level exceedance was recorded for impact air quality monitoring in the reporting period. Relevant investigation and follow-up action were conducted according to the EM&A programme. The exceedance was considered not related to the Project after investigation.

The monitoring results for impact noise monitoring complied with the Action/ Limit levels in the reporting period.

Two (2) Limit Level exceedances were recorded for impact water quality monitoring in the reporting period. Relevant investigations and follow-up actions were conducted according to the EM&A programme. The exceedances were considered not related to the Project after investigation.

Environmental site inspections were carried out during the reporting period.

Recommendations on remedial actions were given to the Contractors for the deficiencies identified during the site inspections.

There was no environmental complaint, notification of summons or prosecution recorded in the reporting period.

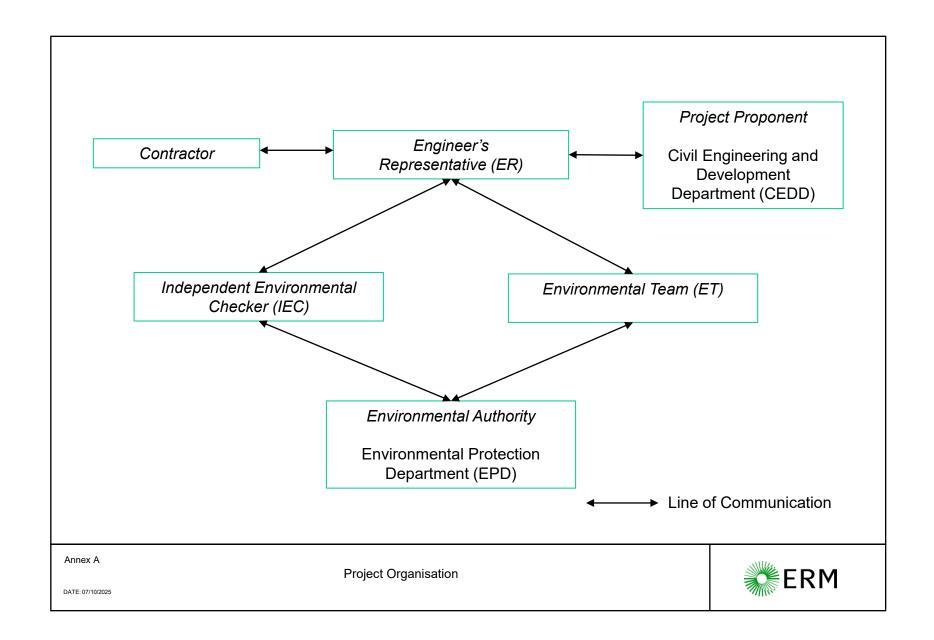

The ET will keep track on the construction works to confirm compliance with environmental requirements and the proper implementation of all necessary mitigation measures.

San Tin Technopole Phase 1 (East) - Contract 1 - Site Formation and Engineering Infrastructure Works

Revised Programme - July 2025

ANNEX C

ENVIRONMENTAL LICENSES AND PERMITS OF THE PROJECT

### ANNEX C STATUS OF STAUTORY ENVIRONMENTAL REQUIREMENTS

Contract No.	Description	Ref. / License No	Effective Date	Expiry Date	Status	Remark
General	Environmental Permit	EP-664/2025	08 July 2025	End of Project	Valid	For Revitalisation of San Tin Eastern Main Drainage Channel
		EP-665/2025	08 July 2025	End of Project	Valid	For Recreational Development ("Open Space") along San Tin Western Main Drainage Channel and at Mai Po Lung Village within Deep Bay Buffer Zone 2
		EP-666/2025	08 July 2025	End of Project	Valid	For New Primary Distributor Road (Road P1) and District Distributor Roads (Roads D1, D2, D3, D4, D5 and D6) for San Tin/Lok Ma Chau Development Node
ND/2024/09	Environmental Permit	EP-640/2024	28 May 2024	End of Project	Valid	For San Tin/Lok Ma Chau Water Reclamation Plant
		EP-641/2024	28 May 2024	End of Project	Valid	For San Tin/Lok Ma Chau Effluent Polishing Plant
	Notification of Construction Works under the Air Pollution Control (Construction Dust) Regulation	10012833	03 Jan 2025	End of Project	Notified	-
	Billing Account for Disposal of Construction Waste	7053501	16 Jan 2025	End of Project	Valid	-
	Registration as Chemical Waste Producer	WPN-5111-543- C5039-01	28 Jan 2025	End of Project	Valid	-
	Registration as Y- PARK Member	C0312	08 Jan 2025	End of Project	Valid	-

Contract No.	Description	Ref. / License No	Effective Date	Expiry Date	Status	Remark
	Discharge License under Water Pollution Control Ordinance	WT00046666- 2025	05 June 2025	30 June 2030	Valid	-
	Construction Noise Permit	GW-RN0799-25	18 July 2025	17 October 2025	Valid, superseded by GW- RN1197-25 after 17 October 2025	For Mai Po Nature Reserve near Observation Tower
	Construction Noise Permit	GW-RN1197-25	18 October 2025	17 February 2026	Valid	For Mai Po Nature Reserve near Observation Tower
	Marine Dumping Permit	EP/MD/26-017	11 August 2025	10 November 2025	Valid	For Channel G at Shan Pui River (dredging area bounded by points 1 to 765)
ND/2024/10	Notification of Construction Works under the Air Pollution Control (Construction Dust) Regulation	10012908	14 Jan 2025	End of Project	Valid	-
	Billing Account for Disposal of Construction Waste	7053388	08 January 2025	End of Project	Valid	-
	Registration as Y- PARK Member	C0325	11 April 2025	End of Project	Valid	-
	Discharge License under Water Pollution Control Ordinance	WT00047149- 2025	31 October 2025	31 October 2030	Valid since 31 October 2025	For Site Area Part A1 – A12

Contract No.	Description	Ref. / License No	Effective Date	Expiry Date	Status	Remark
	Registration as Chemical Waste Producer	WPN5111-542- K3625-01	14 February 2025	End of Project	Valid	-
	Construction Noise Permit	GW-RN0930-25	15 August 2025	10 November 2025	Valid	For Construction site near Hong Kong Institute of Construction San Tin Training Ground
	Construction Noise Permit	N/A (application Ref. No. 10022957)	N/A	N/A	Pending Approval	For Construction for Box Culvert

ANNEX D1

CALIBRATION CERTIFICATES (ONSITE SENSORS)

# **Product Information:**

Report No.:	ZR/T CS.004-2025-09-Z05			
Product Model:	MAS Dust	Serial No.:	dev9204Z250700005	
Issue Date:	2025-10-13			
<b>Version</b> V1.2_20251013				

# Traceability of Calibration Instrument:

Test Item	Calibration Instrument
PM <sub>2.5</sub> (FSP)	Transfer Standard: dev9524C230400003
PM <sub>10</sub> (RSP)	Location: M09 Wing Ping Tsuen
	Collocation Data Period: 2025-09-17 16:20 to 2025-09-17 19:20

# Calibration Result:

#### RSP:

Performance Metric	Target Value	Actual Value	Result		
<u>Tier 1</u>					
Bias (Slope)	1.00±0.25	1.09	☑ PASS		
Linearity (R <sup>2</sup> )	> 0.70	0.75	☑ PASS		
If Tier 1 fails, Conc. Range	RSP $\leq$ 30 µg/m³ is low conc.	5.0 μg/m <sup>3</sup>	Not applicable		
will be checked	range				
<u>Tier 2</u>					
Error (RMSE)	< 8 μg/m³ for RSP	4.8 μg/m <sup>3</sup>	☑ PASS		

Remark: Follow QAQC Protocol Path 1 which both Criteria Tier 1 and Tier 2 passed.

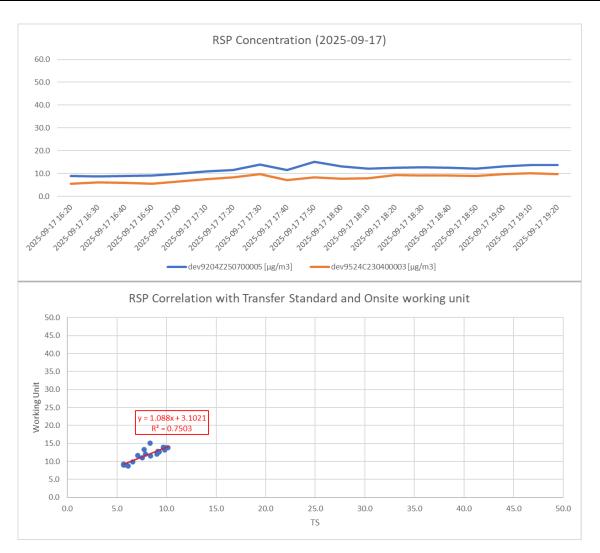

#### FSP:

Performance Metric	Target Value	Actual Value	Result	
<u>Tier 1</u>				
Bias (Slope)	1.00±0.25	0.91	☑ PASS	
Linearity (R <sup>2</sup> )	> 0.70	0.93	☑ PASS	
If Tier 1 fails, Conc. Range	$FSP \leq 25 \mu g/m^3$ is low conc.	4.5 μg/m <sup>3</sup>	Not applicable	
will be checked	range			
<u>Tier 2</u>				
Error (RMSE)	< 5 μg/m³ for FSP	2.9 μg/m <sup>3</sup>	☑ PASS	

Remark: Follow QAQC Protocol Path 1 which both Criteria Tier 1 and Tier 2 passed.

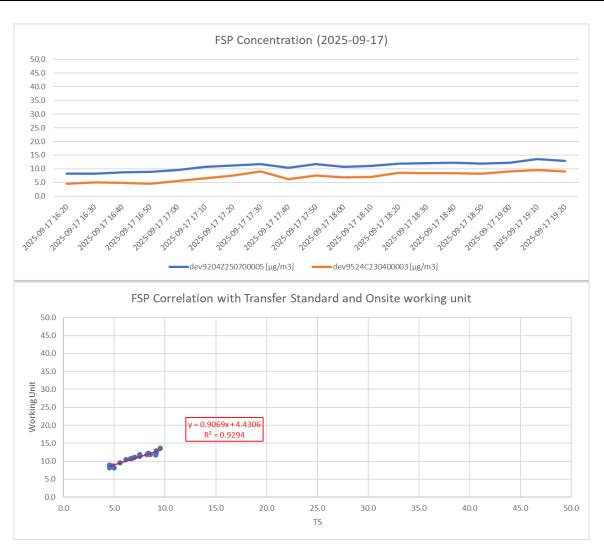

## Conclusion:

will be checked	range				
<u>Tier 2</u>					
Error (RMSE)	< 8 μg/m³ for RSP	3.5 μg/m <sup>3</sup>	☑ PASS		

Remark: Follow QAQC Protocol Path 1 which both Criteria Tier 1 and Tier 2 passed.

### FSP:

Performance Metric	Target Value	Actual Value	Result
Tier 1			
Bias (Slope)	1.00±0.25	0.80	☑ PASS
Linearity (R <sup>2</sup> )	> 0.70	0.76	☑ PASS
If Tier 1 fails, Conc. Range	$FSP \leq 25 \mu g/m^3$ is low conc.	17.2 μg/m <sup>3</sup>	Not applicable
will be checked	range		
<u>Tier 2</u>			
Error (RMSE)	< 5 μg/m³ for FSP	2.0 μg/m <sup>3</sup>	☑ PASS

Remark: Follow QAQC Protocol Path 1 which both Criteria Tier 1 and Tier 2 passed.

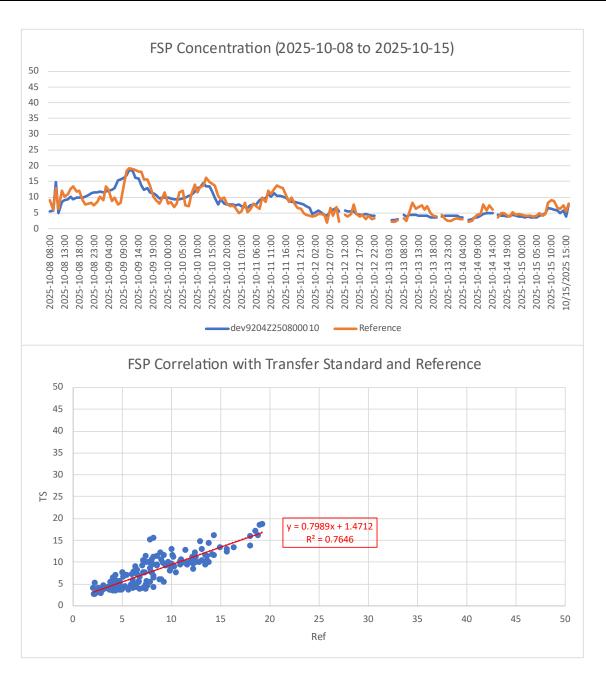

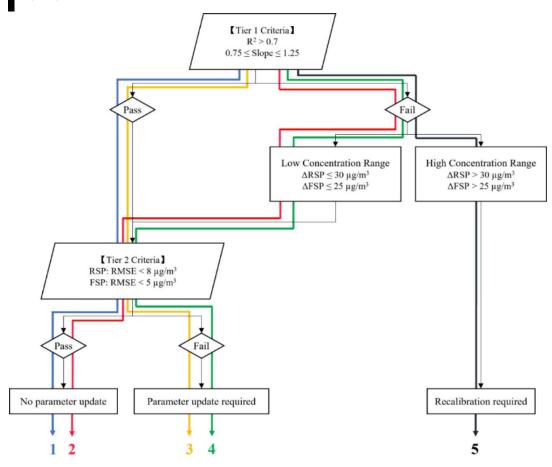

## Conclusion:

Prepared by: Yannis Qiu	Reviewed by:	George Zhang
-------------------------	--------------	--------------

## **Product Information:**

Report No.:	ZR/T CS.004-2025-10-Z11		
Product Model:	MAS Dust <b>Serial No.:</b> dev9204Z250800011		
Issue Date:	2025-11-12		
Version	V2.0_20251112		

# **Traceability of Calibration Instrument:**

Test Item	Calibration Instrument	
PM <sub>2.5</sub> (FSP)	Location: HKUST Air Quality Research Supersite Facility	
PM <sub>10</sub> (RSP)	Collocation Data Time: 2025-10-08 08:00 to 2025-10-15 16:00	

## **Calibration Result:**

### RSP:

Performance Metric	Target Value	Actual Value	Result		
<u>Tier 1</u>	<u>Tier 1</u>				
Bias (Slope)	1.00±0.25	0.90	☑ PASS		
Linearity (R <sup>2</sup> )	> 0.70	0.84	☑ PASS		
If Tier 1 fails, Conc. Range	RSP $\leq$ 30 µg/m³ is low conc.	35.8 μg/m <sup>3</sup>	Not applicable		
will be checked	range				
<u>Tier 2</u>					
Error (RMSE)	< 8 μg/m³ for RSP	3.7 μg/m <sup>3</sup>	☑ PASS		

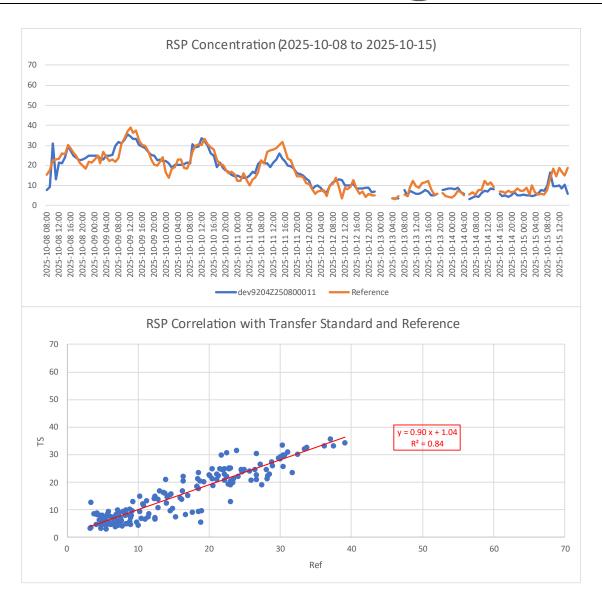

Remark: Follow QAQC Protocol Path 1 which both Criteria Tier 1 and Tier 2 passed.

### FSP:

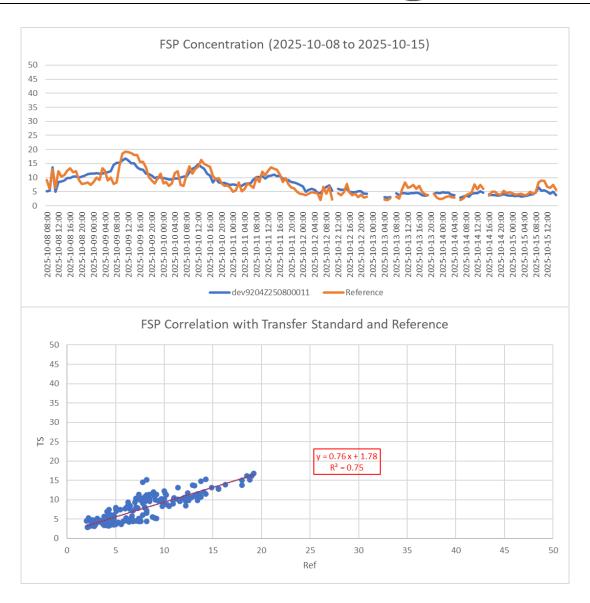

Performance Metric	Target Value	Actual Value	Result
<u>Tier 1</u>			
Bias (Slope)	1.00±0.25	0.76	☑ PASS
Linearity (R <sup>2</sup> )	> 0.70	0.75	☑ PASS
If Tier 1 fails, Conc. Range	$FSP \le 25 \mu g/m^3$ is low conc.	17.2 μg/m³	Not applicable
will be checked	range		
<u>Tier 2</u>			
Error (RMSE)	< 5 μg/m³ for FSP	2.0 μg/m <sup>3</sup>	☑ PASS

Remark: Follow QAQC Protocol Path 1 which both Criteria Tier 1 and Tier 2 passed.

Certificate No.:

AV250047

AV250047

The calibration equipment used for calibration is traceable to National Standards via Standards and Calibration Laboratory, the Government of the HKSAR.

The values given in this certification only related to the values measured at the time of the calibration and any uncertainties quoted, if any, will not allow for the equipment long-term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the calibration. Acoustic Testing Services Limited shall not be liable for any loss or damage resulting from the use of the equipment.

#### Calibration Results

Nominal value	Measured value	IEC 60942 Class 1 Tolerance Limits	Conclusion	Expanded Measurement Uncertainty of Reference Microphone B&K 4189 at 1000 Hz
dB	dB	dB		dB
94.00	93.84	± 0.25	PASS	0.20
114.0	113.75	± 0.25	PASS	0.20

All calibration points are within manufacturer's specification.

# 5. Calibration Results Applied

The results apply to the particular unit-under-test only. All calibration points are within manufacture's specification as IEC 61672 Class 1.

Uncertainties of Applied Value:

94 dB	31.5 Hz	± 0.05
	63 Hz	± 0.10
	125 Hz	± 0.05
	250 Hz	± 0.05
	500 Hz	± 0.05
	1000 Hz	± 0.05
	2000 Hz	± 0.05
	4000 Hz	± 0.05
	8000 Hz	± 0.10
104 dB	1000 Hz	± 0.05
114 dB	1000 Hz	± 0.05

The uncertainties are evaluated for a 95% confidence level.

#### Note:

The values given in this certification only related to the values measured at the time of the calibration and any uncertainties quoted will not allow for the equipment long-term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the calibration. (A+A)\*L shall not be liable for any loss or damage resulting from the use of the equipment.

# **Certificate of Calibration**

Certificate No. ATS25-066-CC004

**Customer:** 

**Envirotech Services Company** 

Room 712, 7/F, My Loft,

9 Hoi Wing Road, Tuen Mun

N.T., Hong Kong

Unit-under-test (UUT):

Description:

Sound Level Meter

Microphone

Pre-amplifier

Manufacturer:

RION

Type No.:

NL-52

UC-59

NH-25

Serial No.:

00542913

06829

76317

Conditions during calibration:

Temperature:

26°C

Relative Humidity:

56%

**Test Specifications:** 

Calibration Check

Date of calibration:

22 August 2025

Test Results:

All calibration points are within manufacturer's specification.

Certified by:

Mr. Y. T. EUNG kTechnical Manager

MIOA, MHKTOEP

Issue Date: 22 August 2025

Unit E, 2/F., Century Industrial Centre, 33-35 Au Pui Wan Street, Fo Tan, Shatin, New Territories, Hong Kong Tel: (852) 2690 9126 Fax: (852) 2690 9125 E-mail: info@ATSL.com.hk http://www.ATSL.com.hk

1. The instrument under test was allowed to stabilize in the laboratory for over 24 hours.

#### 2. Calibration equipment:

Description:

Acoustical Calibrator

Manufacturer & Type:

Brüel & Kjær 4231

Serial No.:

2478237

**Last Calibration Date:** 

18 February 2025

Certificate No.:

AV250027

The calibration equipment used for calibration is traceable to National Standards via Standards and Calibration Laboratory, the Government of the HKSAR.

- 3. The Sound Analyzer has been calibrated in accordance with the requirements as specified in IEC 61672-1 Class 1, and vendor specific procedures.
- 4. The values given in this certification only related to the values measured at the time of the calibration and any uncertainties quoted, if any, will not allow for the equipment long-term drift, variations with environmental changes, vibration and shock during transportation, overloading, mis-handling, or the capability of any other laboratory to repeat the calibration. Acoustic Testing Services Limited shall not be liable for any loss or damage resulting from the use of the equipment.

#### 5. Calibration Results

Setting of unit-under-test (UUT)			Applied value		UUT	IEC 61672-1 Class 1	Canalusian	
Range, dB	Parameter	Frequency Weighting	Response	Level, dB	Frequency, Hz	Reading, dB	Tolerance Limits, dB	Conclusion
			F	5		94.1	± 0.7	PASS
		Α	S	94.00		94.1	± 0.7	PASS
		_	F		4000	94.1	± 0.7	PASS
		С	S		1000	94.1	± 0.7	PASS
30-130	SPL	SPL L	F			94.1	± 0.7	PASS
			S			94.1	± 0.7	PASS
		А	F	114.00	1000	114.1	± 0.7	PASS
			S			114.1	± 0.7	PASS -

All calibration points are within manufacturer's specification.

# REPORT OF EQUIPMENT PERFORMANCE CHECK/CALIBRATION

CONTACT: MR K.W. FAN WORK ORDER: HK2539507

**CLIENT:** ENVIROTECH SERVICES CO.

ADDRESS: RM 712, 7/F, MY LOFT SUB-BATCH: 0

9 HOI WING ROAD,
TUEN MUN, N.T. HK

DATE RECEIVED:
12-Sep-2025
DATE OF ISSUE:
19-Sep-2025

#### **GENERAL COMMENTS**

The performance of the equipment stated in this report is checked with independent reference material and results compared against a calibrated secondary source.

The "Tolerance Limit" quoted is the acceptance criteria applicable for similar equipment used by the laboratory or quoted from relevant international standards.

The "Next Calibration Date" is recommended according to best practice principle as practised by the laboratory or quoted from relevant international standards.

The validity of equipment/ meter performance only applies to the result(s) stated in the report.

This report superseded any previous report(s) with same work order number.

#### **EQUIPMENT INFORMATION**

Equipment information (Brand name, Model No., Serial No. and Equipment No.) is provided by client.

Equipment Type: Multifunctional Meter Service Nature: Performance Check

Scope: Conductivity, Dissolved Oxygen, pH Value, Turbidity, Salinity and Temperature

Brand Name/ Model No.: [HORIBA]/ [U-53]
Serial No./ Equipment No.: [FXMONLLF]/ [N/A]
Date of Calibration: 19-September-2025

M

Ms. Cheng Sin Ying, May Senior Chemist - Inorganics

This report shall not be reproduced except in full without the written approval of the laboratory.

# REPORT OF EQUIPMENT PERFORMANCE CHECK/CALIBRATION

WORK ORDER: HK2539507

**SUB-BATCH:** 0

**DATE OF ISSUE:** 19-Sep-2025

**CLIENT:** ENVIROTECH SERVICES CO.

Equipment Type:

Multifunctional Meter

Brand Name/ Model No.:

[HORIBA]/[U-53]

Serial No./ Equipment No.:

[FXMONLLF]/[N/A]

Date of Calibration:

19-September-2025

Date of Next Calibration:

19-December-2025

**PARAMETERS:** 

Conductivity

Method Ref: APHA (23rd edition), 2510B

Expected Reading (µS/cm)	Displayed Reading (μS/cm)	Tolerance (%)
146.9	156	+6.2
6667	6230	-6.6
12890	12300	-4.6
58670	57100	-2.7
	Tolerance Limit (%)	±10.0

**Dissolved Oxygen** 

Method Ref: APHA (23rd edition), 4500O: G

Expected Reading (mg/L)	Displayed Reading (mg/L)	Tolerance (mg/L)
2.41	2.34	-0.07
4.58	4.67	+0.09
7.34	7.25	-0.09
	Tolerance Limit (mg/L)	±0.20

pH Value

Method Ref: APHA (23rd edition), 4500H: B

Expected Reading (pH unit)	Displayed Reading (pH unit)	Tolerance (pH unit)
4.0	3.83	-0.17
7.0	6.82	-0.18
10.0	9.86	-0.14
	Tolerance Limit (pH unit)	±0.20

Remark: "Displayed Reading" presents the figures shown on item under calibration / checking regardless of equipment precision or significant figures.

	measures and ensure that they are implemented.			

ANNEX G

WASTE FLOW TABLE

#### Waste Flow Table of All Works Contracts

Month	Contract No.	Inert C&D Materials <sup>(a) (b)</sup>	Imported Fill <sup>(c)</sup>	Inert Constrction Waste Reused <sup>(d)</sup>	Non-inert Construction Waste (e)	Recycable Materials (f)	Chemical Waste
		(m <sup>3</sup> )	(m <sup>3</sup> )	(m <sup>3</sup> )	(tonnes)	(tonnes)	(tonnes)
	ND/2024/09	0.00	0.00	0.00	136.07	0.000	0.00
September 2025	ND/2024/10	13.75	0.00	0.00	27.95	0.000	0.00
	Sub-total	13.75	0.00	0.00	164.02	0.000	0.00
	ND/2024/09	0.00	0.00	0.00	5.00	0.003	0.00
October 2025	ND/2024/10	0.00	0.00	0.00	35.73	0.000	0.00
	Sub-total	0.00	0.00	0.00	40.73	0.003	0.00
Tota	ıl	13.75	0.00	0.00	204.75	0.003	0.00

#### Note:

- (a) Inert construction wastes include hard rock and large broken concrete, and materials disposed as public fill.
- (b) The conversion factor for inert C&D Materials for ND/2024/10 is 2.4 tonnes/m<sup>3</sup>.
- (c) Imported materials from any source outside of the Project.
- (d) Reuse of inert construction waste generated under the Project.
- (e) Non-inert construction wastes include general refuse disposed at landfill.
- (f) Recyclable materials include metals, paper, cardboard, plastics and others.

ANNEX H

ENVIRONMENTAL MITIGATION IMPLEMENTATION SCHEDULE

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation Agent	_	ement Stage*		Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	С	0	& Guidelines
Air Quality	Impact			<u>'</u>				
3.8.1.1	All DPs and Non-DPs	<ul> <li>Dust suppression measures stipulated in Air Pollution Control (Construction Dust) Regulation and good site practices listed below should be carried out to further minimize construction dust impact.</li> <li>Use of regular watering to reduce dust emissions from exposed site surfaces and unpaved roads, particularly during dry weather.</li> <li>Use of frequent watering for particularly dusty</li> <li>construction areas and areas close to ASRs.</li> <li>Side enclosure and covering of any aggregate or dusty material storage piles to reduce emissions. Where this is not practicable owing to frequent usage, watering shall be applied to aggregate fines.</li> <li>For the work sites close to the ASRs with a separation distance less than 10 m, provide hoardings of not less than 3 m high from ground level along the site boundary; for the other work sites in general, provide hoarding not less than 2.4m high from ground level along site boundary except for site entrance or exit.</li> <li>Avoid position of material stockpiling areas, major haul roads and dusty works within the construction site close to concerned ASRs.</li> <li>Avoid unnecessary exposed earth.</li> </ul>	Construction Sites / Construction Phase	Contractor		✓		Air Air Pollution     Control Ordinance     (APCO)     Air Quality     Objectives (AQO)     Technical     Memorandum on     Environmental     Impact     Assessment     Process (EIAO-TM)

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	_	lementa Stage*		Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		<ul> <li>Locate all the dusty activities away from any nearby ASRs as far as practicable.</li> <li>Open stockpiles shall be avoided or covered. Where possible, prevent placing dusty material storage piles near ASRs.</li> <li>Tarpaulin covering of all dusty vehicle loads transported to, from and between site locations.</li> <li>Establishment and use of vehicle wheel and body washing facilities at the exit points of the site.</li> <li>Where possible, routing of vehicles and positioning of construction plant should be at the maximum possible distance from ASRs.</li> <li>Imposition of speed controls for vehicles on site haul roads.</li> <li>Instigation of an environmental monitoring and auditing program to monitor the construction process in order to enforce controls and modify method of work if dusty conditions arise.</li> </ul>						
3.8.1.2	All DPs and Non-DPs	Guidelines stipulated in EPD's Recommended Pollution Control Clauses for Construction Contracts should be incorporated in the contract document to abate dust impacts. These clauses include:  The Contractor shall observe and comply with APCO and its subsidiary regulation, particularly the Air Pollution Control (Construction Dust) Regulation.	Construction Sites / Construction Phase	Contractor		✓		APCO     Air Pollution     Control     (Construction     Dust) Regulation     AQO     EIAO-TM

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	0	& Guidelines
		<ul> <li>The Contractor shall undertake at all times to prevent dust nuisance as a result of the construction activities.</li> <li>The Contractor shall ensure that there will be adequate water supply /storage for dust suppression.</li> <li>The Contractor shall devise and arrange methods of working and carrying out the works in such a manner so as to minimize dust impact on the surrounding environment, and shall provide experienced personnel with suitable training to ensure that these methods are implemented properly.</li> <li>Before the commencement of any work, the Contractor may be required to submit the methods of working, plant, equipment and air pollution control system to be used on the site for the Engineer inspection and approval.</li> </ul>						
3.8.1.3	All DPs and Non-DPs	In order to help reduce carbon emission and pollution, timely application of temporary electricity and water supply would be made and electric vehicles would be adopted in accordance with DEVB TC(W) No. 13/2020 – Timely Application of Temporary Electricity and Water Supply for Public Works Contracts and Wider Use of Electric Vehicles in Public Works Contracts in the Project.	Construction Sites / Construction Phase	Contractor		✓		• DEVB TC(W) No. 13/2020
3.8.1.4	All DPs and Non-DPs	To minimise the exhaust emission from non-road mobile machinery (NRMMs) during the construction phase, the following measures should be applied as far as practicable:	Construction Sites / Construction Phase	Contractor		<b>√</b>		Air Pollution     Control (Non-road     Mobile Machinery)

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		<ul> <li>Connect construction plant and equipment to main electricity supply and avoid use of diesel generators and diesel-powered equipment;</li> <li>Avoid exempted NRMMs as far as practicable; and Deploy electrified NRMMS as far as practicable.</li> </ul>						(Emission) Regulation
Noise Impac	t	,	'	'			!	
4.8.1.1 - 4.8.1.2	All DPs and Non-DPs	Adopting Quality Powered Mechanical Equipment (QPME) is recommended. The use of QPME associated with the construction works is prescribed in EPD's QPME database, which contains the sound power levels (SWLs) for quality/quiet PME of various types, brands and models.	Construction sites	Contractor		1		• EIAO-TM
4.8.1.3	All DPs and Non-DPs	Movable noise barriers have been proposed for excavator, mobile crane, loader, backhoe, dump truck, dump truck with grab, piling (large diameter bored, RCD), piling (large diameter bored, oscillator), crawler crane (mobile, diesel), roller (vibratory), paint line marker, cherry picker, crane lorry, crane, welding set, lorry, breaker (hand-held, mass >10kg and <20kg), poker (vibratory, hand-held), concrete lorry mixer, concrete mixer, bar bender and cutter (electric), saw (circular, wood), water pump (submersible, electric), breaker (hand-held, mass <= 10kg), piling (vibrating hammer), chisel, drill rig (rotary type (diesel)), asphalt paver, cutter (circular, steel), drilling rig, etc. Movable temporary noise barriers that can be located close to noisy plant	Construction sites	Contractor		✓ ————————————————————————————————————		• EIAO-TM

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	Des C O	0	& Guidelines
		and be moved iteratively with the plant along a worksite can be very effective for screening noise from noise sensitive receivers (NSRs). A cantilevered top cover would be required to achieve screening benefits at upper floors of noise sensitive receivers (NSRs).						
4.8.1.4	All DPs and Non-DPs	Use of full enclosure for generator (silenced), Generator for HAC, and generator for DCM.	Construction sites	Contractor		<b>√</b>		EIAO-TM
4.8.1.5	All DPs and Non-DPs	Use of non-percussive equipment and method, such as silent piling by "Press-in" Method, to carry out sheet piling works.	Construction sites	Contractor		✓		EIAO-TM
4.8.1.6	All DPs and Non-DPs	Use of non-percussive equipment and method, such as hydraulic crusher, chemical expansion agent, quieter type blade saw and bursting system to carry out demolition/concrete breaking/removal activities as far as practicable	Construction sites	Contractor		✓		EIAO-TM
4.8.1.7	All DPs and Non-DPs	For Ground Treatment – High Arsenic Containing Soil, the construction equipment i.e. roller and excavator should not be used simultaneously with backhoe and bulldozer.	Construction sites of A.2.1-1-1, A.2.1-2-1 and A.5.3-0-1	Contractor		1		EIAO-TM
4.8.1.11	All DPs and Non-DPs	Construction Noise Management Plan would be prepared before tender stage and before commencement of construction works to verify the inventory of noise sources, and to assess the effectiveness and practicality of all identified measures for mitigating the construction noise impact of the project.	Construction sites	CEDD/ Contractor		✓		• EIAO-TM

**Water Quality Impact** 

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	_	ement Stage*		Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	o	& Guidelines
5.7.1.3	All DPs and Non-DPs	Surface run-off from construction site should be discharged into storm drains via adequately designed sand / silt removal facilities such as sand traps, silt traps and sedimentation basins. Channels, earth bunds or sand bag barriers should be provided on site to properly direct stormwater to such silt removal facilities. Perimeter channels at site boundaries should be provided as necessary to intercept storm run-off from outside the site so that it will not wash across the site. Catchpits and perimeter channels should be constructed in advance of site formation works and earthworks.	Construction Sites / Construction Phase	Contractor		1		Water Pollution     Control Ordinance     (WPCO)     EIAO-TM     Professional     Persons     Environmental     Consultative     Committee     Practice Notes     (ProPECC PN) 2/23
5.7.1.4	All DPs and Non-DPs	Silt removal facilities, channels and manholes should be maintained and the deposited silt and grit should be removed regularly (as well as at the onset of and after each rainstorm) to prevent overflows and localised flooding. Before disposal at the public fill reception facilities, the deposited silt and grit should be solicited in such a way that it can be contained and delivered by dump truck instead of tanker truck. Any practical options for the diversion and realignment of drainage should comply with both engineering and environmental requirements in order to provide adequate hydraulic capacity of all drains.	Construction Sites / Construction Phase	Contractor		V		WPCO     EIAO-TM     ProPECC PN 2/23
5.7.1.5	All DPs and Non-DPs	Construction works should be programmed to minimise soil excavation in the wet season (i.e. April to September). If soil excavation cannot be avoided in these months or at any time of year when rainstorms are likely, temporarily exposed	Construction Sites / Construction Phase	Contractor		<b>√</b>		WPCO     EIAO-TM     ProPECC PN 2/23

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation Agent	_	lementa Stage*		Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	С	0	u
		slope surfaces should be covered e.g. by tarpaulin, and temporary access roads should be protected by crushed stone or gravel, as excavation proceeds. Intercepting channels should be provided (e.g. along the crest / edge of excavation) to prevent storm run-off from washing across exposed soil surfaces.  Arrangements should always be in place in such a way that adequate surface protection measures can be safely carried out well before the arrival of rainstorm.						
5.7.1.6	All DPs and Non-DPs	Earthworks final surfaces should be well compacted and the subsequent permanent work or surface protection should be carried out immediately after the final surfaces are formed to prevent erosion caused by rainstorms.  Appropriate drainage like intercepting channels should be provided where necessary.	Construction Sites / Construction Phase	Contractor		<b>√</b>		WPCO     EIAO-TM     ProPECC PN 2/23
5.7.1.7	All DPs and Non-DPs	Measures should be taken to minimise the ingress of rainwater into trenches. If excavation of trenches in the wet season is necessary, they should be dug and backfilled in short sections. Rainwater pumped out from trenches or foundation excavations should be discharged into storm drains via silt removal facilities.	Construction Sites / Construction Phase	Contractor		1		<ul><li>WPCO</li><li>EIAO-TM</li><li>ProPECC PN 2/23</li></ul>
5.7.1.8	All DPs and Non-DPs	Open stockpiles of construction materials (e.g. aggregates, sand and fill material) on sites should be covered with tarpaulin or similar fabric during rainstorms. Measures should be taken to prevent	Construction Sites / Construction Phase	Contractor		<b>√</b>		WPCO     EIAO-TM     ProPECC PN 2/23

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation Stage* Releva		_		Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		the washing away of construction materials, soil, silt or debris into any drainage system.						
5.7.1.9	All DPs and Non-DPs	Manholes (including newly constructed ones) should always be adequately covered and temporarily sealed so as to prevent silt, construction materials or debris from getting into the drainage system, and to prevent storm runoff from getting into foul sewers. Discharge of surface run-off into foul sewers must always be prevented in order not to unduly overload the foul sewerage system.	Construction Sites / Construction Phase	Contractor		✓		WPCO     EIAO-TM     ProPECC PN 2/23
5.7.1.10	All DPs and Non-DPs	Water used in ground boring and drilling for site investigation or rock / soil anchoring should as far as practicable be recirculated after sedimentation. When there is a need for final disposal, the wastewater should be discharged into storm drains via silt removal facilities.	Construction Sites / Construction Phase	Contractor		1		<ul><li>WPCO</li><li>EIAO-TM</li><li>ProPECC PN 2/23</li></ul>
5.7.1.11	All DPs and Non-DPs	All vehicles and plants should be cleaned before they leave a construction site to minimise the deposition of earth, mud and debris on roads. A wheel washing bay should be provided at every site exit if practicable and washwater should have sand and silt settled out or removed before discharging into storm drains. The section of construction road between the wheel washing bay and the public road should be paved to reduce vehicle tracking of soil and to prevent site run-off from entering public road drains.	Construction Sites / Construction Phase	Contractor		<b>√</b>		EIAO-TM     WPCO     Waste Disposal     Ordinance (WDO)     ProPECC PN 2/23

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*		Stage		Stage*		Implementation Stage*			Relevant Legislation & Guidelines  • WPCO • EIAO-TM • ProPECC PN 2/23 • Technical     Memorandum on     Standards for     Effluents     Discharged into     Drainage and     Sewerage     Systems, Inland     and Coastal     Waters (TM-DSS)  • WPCO • EIAO-TM • WDO • ProPECC PN 2/23  • WPCO • EIAO-TM • ProPECC PN 2/23
	Project (DP)		Completion of Measures	Agent	Des	С	0	& Guidelines						
5.7.1.12	All DPs and Non-DPs	Acidic wastewater generated from acid cleaning, etching, pickling and similar activities should be neutralised to within the pH range of 6 to 10 before discharging into foul sewers. If there is no public foul sewer in the vicinity, the neutralised wastewater should be tankered off site for disposal into foul sewers or treated to a standard acceptable to storm drains and the receiving waters.	Construction Sites / Construction Phase	Contractor		✓		EIAO-TM     ProPECC PN 2/23     Technical     Memorandum on     Standards for     Effluents     Discharged into     Drainage and     Sewerage     Systems, Inland     and Coastal						
5.7.1.13	All DPs and Non-DPs	Good site practices should be adopted to remove rubbish and litter from construction site so as to prevent the rubbish and litter from spreading from the site area. It is recommended to clean the construction site on a regular basis.	Construction Sites / Construction Phase	Contractor		✓		• EIAO-TM • WDO						
5.7.1.14	All DPs and Non-DPs	There is a need to apply to EPD for a discharge licence for discharge of effluent from the construction site under the WPCO. The discharge quality must meet the requirements specified in the discharge licence. All the runoff and wastewater generated from the works areas should be treated so that it satisfies all the standards listed in the TM-DSS. The beneficial uses of the treated effluent for other on-site activities such as dust suppression, wheel washing and general cleaning etc., can minimise water consumption and reduce the effluent discharge volume. If monitoring of the treated	Construction Sites / Construction Phase	Contractor		✓		<ul><li>EIAO-TM</li><li>ProPECC PN 2/23</li></ul>						

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation Agent		lementa Stage*		Relevant Legislation

		transportation of waste from works areas to respective disposal outlets. The following recommendation should be implemented to minimise the impacts:  Remove waste in timely manner; Employ the trucks with cover or enclosed containers for waste transportation; Obtain relevant waste disposal permits from the appropriate authorities; and Dispose of waste at licensed waste disposal facilities.						
7.6.2.1	All DPs and Non-DPs	Construction and Demolition Materials Careful design, planning together with good site management can reduce over-ordering and generation of Construction and Demolition (C&D) materials such as concrete, mortar and cement grouts. Formwork should be designed to minimise the use of standard wooden panels, so that high reuse levels can be achieved. Alternatives such as steel formwork or plastic facing should be considered to increase the potential for reuse.	Construction Sites	Contractor		1		• WDO
7.6.2.2	All DPs and Non-DPs	The inert C&D materials with suitable characteristics / size should be reused on-site as fill or recycled as aggregate for other projects as far as practicable. When disposing C&D material at a public filling reception facility for beneficial reuse, the material should only consist of soil, rock, concrete, brick, cement plaster / mortar, inert building debris, aggregates and asphalt. The material should be free from household refuse, plastic, metals, industrial and chemical waste,	Construction Sites	Contractor		<b>√</b>		• WDO

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		animal and vegetable matter, and other material considered to be unsuitable by the Filling Supervisor. Prior to disposal of noninert C&D materials, wood, steel and other metals should also be separated for reuse and / or recycling where practicable so as to minimise the quantity of waste to be disposed of at landfill.						
7.6.2.3	All DPs and Non-DPs	Suitable areas should be designated within the site boundaries for sorting and providing temporary stockpiling of C&D materials. Within stockpile areas, the following measures should be taken to control potential environmental impacts or nuisance:  • Surface of stockpiled soil should be regularly wetted with water especially during dry season;  • Disturbance of stockpile soil should be minimised;  • Stockpiled soil should be properly covered with tarpaulin especially when heavy storms are predicted; and  • Stockpiling areas should be enclosed where space is available.	Construction Sites	Contractor		✓		• WDO • ETWB TCW No.19/2005
7.6.2.4	All DPs and Non-DPs	In order to monitor the delivery of C&D materials at the designated public fill reception facility and landfill and to control fly-tipping, a trip-ticket system should be included. A recording system for the amount of waste generated, recycled and disposed, including the disposal sites, should also be set up. Warning signs should be put up to remind the designated disposal sites. CCTV should	Construction Sites	Contractor		✓		WDO     DEVB TC(W)     No.06/2010     Land     (Miscellaneous     Provisions)     Ordinance (Cap. 28)

	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidennes		
		<ul> <li>Provision of decontamination facilities for cleaning of workings, equipment and bagged waste before leaving the work area;</li> <li>Adoption of engineering control techniques to prevent fibre release from work area, such as use of negative pressure equipment with high efficiency particulate air (HEPA) filters to control air flow between the work area and the outside environment;</li> <li>Wetting of asbestos containing materials before and during disturbance, minimising the breakage and dropping of asbestos containing materials, and packing of debris and waste immediately after it is produced;</li> <li>Cleaning of work area by wet wiping and vacuuming with HEPA-filtered vacuum cleaner;</li> <li>Coating on any surfaces previously in contact with or contained by asbestos with a sealant;</li> <li>Proper bagging, safe storage and disposal of asbestos and asbestos-contaminated waste;</li> <li>Pre-treatment of all effluent from the work area before discharged; and</li> <li>Air monitoring strategy to check the leakage and clearance of the work area during and after the asbestos work.</li> </ul>								
7.6.2.9 – 7.6.2.10	All DPs and Non-DPs	Chemical Waste For those processes which generated chemical waste, it may be possible to find alternatives to eliminate the use of chemicals, to reduce the generation quantities or to select a chemical type	Construction Sites	Contractor		<b>√</b>		Waste Disposal     (Chemical Waste)     General)     Regulation		

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation		ement Stage*		Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	0	& Guidelines
		of less impact on environment, health and safety as far as possible. If chemical waste is produced at the construction site, the Contractor will be required to register with the EPD as a chemical waste producer and to follow the guidelines stated in the Code of Practice on the Packaging, Labelling and Storage of Chemical Waste.  Chemical waste should be stored in appropriate containers and collected by a licensed chemical waste contractor. Chemical waste (e.g. spent lubricant oil) should be recycled at an appropriate facility as far as possible, while chemical waste that cannot be recycled should be disposed of at either the Chemical Waste Treatment Centre (CWTC), or another licensed facility, in accordance with the Waste Disposal (Chemical Waste) (General) Regulation.						Code of Practice on the Packaging, Labelling and Storage of Chemical Waste
7.6.2.11 – 7.6.2.12	All DPs and Non-DPs	General refuse General refuse should be stored in enclosed bins or compaction units separate from C&D materials and chemical wastes. A reputable waste collector should be employed by the contractor to remove general from the site, separately from C&D materials and chemical wastes, on a daily basis to minimise odour, pest and litter impacts. The collected general refuse would be disposed of at designated landfill. Clearly labelled recycling bins should be provided on site in order to encourage segregation and recycling of aluminium and plastic wastes, and wastepaper in order to reduce general refuse production.	Construction Sites	Contractor		√ ·		• WDO

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	C	0	& Guidelines
		The contractor should carry out an education programme for workers in avoiding, reducing, reusing and recycling of materials generation. Posters and leaflets advising on the use of the bins should also be provided onsite as reminders. The recyclable waste materials should then be collected by reliable waste recycling agents on a daily basis.						
7.6.2.13	All DPs and Non-DPs	Excavated Sediment Since the amount of excavated sediment generated from the pond excavation works is expected to be small, all excavated sediment will be treated and reused on-site as backfilling materials for the Project. This approach avoids the need for off-site disposal that may result in impacts on the marine environment. In addition, all construction works near the watercourses should be undertaken within a dry zone and during dry season to avoid adverse impacts to the environment. The excavated sediment, if stockpiled on site, should be stored in enclosed containers and transported to the on-site treatment facilities as soon as practicable to minimise any potential odour impacts	Construction Sites	Contractor		✓		• WDO
7.6.2.14	All DPs and Non-DPs	Floating Refuse In case of floating refuse is identified, the floating materials should be removed and eventually stored and disposed of together with the general refuse, after separating the recyclables for recycling. Any floating refuse trapped within the Project area will be collected by the Contractor	Construction Sites	Contractor		<b>√</b>		• WDO

Ecological I	mpact (Terrestri	al and Aquatic)						ı
10.11.1.4	Non-DPs	Enhanced Wetland within the proposed SPS WCP The Government will develop the Sam Po Shue Wetland Conservation Park (SPS WCP) with a proposed area of approximately 338 ha to create environmental capacity for the development of San Tin Technopole. Among the 338 ha, while 10 ha is reserved for supporting facilities such as visitor center and other basic infrastructure, the Government will enhance the ecological function and capacity of 288 ha of wetlands and fisheries resources of 40 ha of fishponds by establishing the SPS WCP with active conservation management and modernised aquaculture to compensate for the loss in wetland habitats and fisheries resources arising from the development of San Tin Technopole and to achieve no-net-loss in ecological function and capacity of the wetlands concerned. Among the 288 ha, there will be 253 ha of "ecologically enhanced fishponds" compensating for pond habitat loss, and 35 ha of "enhanced freshwater wetland habitat" compensating for other freshwater wetland habitat loss. The Government aims to start the development of SPS WCP in around 2026/2027 for completion by 2039 or earlier to tie in with the full operation of San Tin Technopole. For the site formation works of the first batch of land at San Tin Technopole targeted for commencement in late 2024, no pond filling will be involved. On current planning, pond filling works will not start	Enhanced Wetland within the proposed SPS WCP / Construction and Operation Phase	Construction phase: AFCD as project proponent of SPS WCP; CEDD as works agent  Operation phase: AFCD (within completed phases of SPS WCP handed over to AFCD only)				TPB PG-NO. 12C     (Revised May)

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation Agent	Imp	lementa Stage*		Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		until 2026/27, and the pace of pond filling will tie in with the development progress of the SPS WCP. To this end, a working group will be formed between CEDD (as San Tin Technopole's works agent) and AFCD (as SPS WCP's sponsoring department) to coordinate the progress of pond filling and SPS WCP implementation.  Enhancement measures in the form of improvement of tidal channel near Mai Po Nature Reserve and removal of exotic mangrove species in the Deep Bay area will also be implemented. Furthermore, interim wetland enhancement works would also be conducted at suitable ponds in the Inner Deep Bay area prior to the commencement of pond filling works. Both of these measures are further described below.						
10.11.3.3 - 10.11.3.4	Non-DPs	Enhanced Wetland for Pond Habitat Under the current wetland enhancement strategy, about 253 ha of enhanced wetland in the form of "ecologically enhanced fishponds" shall be established within the proposed SPS WCP. These ecologically enhanced fishponds would comprise existing pond habitats, and ponds that would be converted from existing brownfield or wasteland areas. These ponds shall be further enhanced with various features to increase the functional value and the carrying capacity to accommodate for higher abundance of wildlife. Enhancement measures could include:  Increase in pond area and enhance connectivity;	Enhanced Wetland within the proposed SPS WCP / Construction and Operation Phase	Construction phase: AFCD as project proponent of SPS WCP; CEDD as works agent  Operation phase: AFCD (within completed phases of SPS WCP handed over to AFCD only)		✓	✓	• EIAO-TM

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	O	Relevant Legislation & Guidelines
		<ul> <li>Physical modification of pond habitats to increase environmental carrying capacity;</li> <li>Managing and sequencing pond drain down across multiple ponds in the dry season to maximize feeding opportunities for avifauna and other wildlife;</li> <li>Providing fencing/controlling access to reduce disturbance from human activities and also prevent disturbance and predation of wildlife by feral dogs;</li> <li>Removal of existing bird scaring devices at actively managed ponds, where appropriate</li> <li>Stocking ponds with suitable prey items (i.e., trash fish) for target wildlife species (may be considered as an enhancement measure to achieve higher enhancement value).</li> </ul>						
10.11.3.6	Non-DPs	Physical Modification of Pond Habitats Across the entire ecologically enhanced fishpond areas, ponds could be physically modified to enhance ecological function and capacity. Typical measures to be implemented could be based on successful examples in Hong Kong such as the LMC EEA, including:  Consolidating smaller, fragmented ponds into larger waterbodies that support higher densities of avifauna and attract larger, more disturbance sensitive species;  Reprofiling pond banks to make the edges more gently sloping and shallower, increasing the available foraging area for avifauna;	Enhanced Wetland within the proposed SPS WCP / Construction and Operation Phase	Construction phase: AFCD as project proponent of SPS WCP; CEDD as works agent  Operation phase: AFCD (within completed phases of SPS WCP handed over to AFCD only)		<b>√</b>	✓	-

		<ul> <li>Creating habitat islands that provide refuge for avifauna and other wildlife; and</li> <li>Floating platforms / wetlands will be placed in each pond to provide additional foraging areas for wetland avifauna and potential breeding sites for other species.</li> </ul>							
10.11.3.7 - 10.11.3.9	Non-DPs	Pond Drain-down and Water Management To help enhance the functional value of fishpond habitats, the total number of ponds drained down at any one time can be increased over and above levels currently implemented under the current Management Agreement (MA) practice. Under current MA practice, a relatively small number of ponds across the SPS WCP are drained down at any one time. Furthermore, most ponds participating in the programme are only partially drained for a period of 7 days. Feeding opportunities for avifauna could be enhanced by making the following changes to drain-down practices:  The total area of fishponds drain-down at any one time could be increased; Full drain-down will be implemented rather than partial draining; and Similar to recommendations in the approved EIA report for Proposed Development at Fung Lok Wai, Yuen Long (Mutual Luck Investment Limited, 2008), drain-down periods will be extended to longer than typical commercial practices or drain-downs under current practices.	Enhanced Wetland within the proposed SPS WCP / Construction and Operation Phase	AFCD (within completed phases of SPS WCP handed over to AFCD only)		✓	✓		

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation Agent	Imp	lementa Stage*		Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		Extending the length of drain down would allow for water levels to be lowered more gradually. Where ponds have been reprofiled to have a shallower gradient, this would result in progressively larger areas of shallow water/mud being exposed. Overall, this would provide a more stable, high-value feeding habitat for avifauna compared to ponds which are drained down more quickly.  Fishpond water will primarily be supplied by direct rainfall that will be retained and re-circulated during drain-down periods. As with current practice in the area, supplemental water can be sourced from drainage channels that traverse the site as required.  For controlling water levels in the ponds, adjustable sluices or similar water control devices can be provided to connect adjacent ponds, with ponds adjacent to retained drainage channels also having similar devices connecting the ponds to the drainage channels. The water control device levels can be adjusted to allow excess water to flow from pond to pond towards the drainage channels gravity during storm events to prevent overtopping.						
10.11.3.10 - 10.11.3.11	Non-DPs	Controlled Access and Feral Dog Control Public access to ecologically enhanced fishponds habitat area could be controlled to reduce disturbance from human activities. This could be achieved by potentially gating key access points along the Border Road, Tun Yu Road and San Tin	Enhanced Compensatory Wetland within the proposed SPS WCP / Construction and Operation Phase	AFCD (within completed phases of SPS WCP handed over to AFCD only)		<b>√</b>	<b>√</b>	-

		Tsuen Road (where appropriate, subject to detailed design). Smaller gates can be provided to control vehicular access along fishpond bunds. Site access would be maintained and controlled during the construction and operation phases of the SPS WCP.  Measures (such as trapping and neutering) would be adopted to minimize disturbance and predation of wildlife by feral dogs.						
10.11.3.12	Non-DPs	Removing Bird-scaring Devices The use of wire strung across ponds or other devices to discourage birds predating on fish stocks is still relatively common across the proposed SPS WCP area, particularly in the west close to MPNR. Removing these devices will add value to the ponds for wetland avifauna.	Enhanced Compensatory Wetland within the proposed SPS WCP / Construction and Operation Phase	AFCD (within completed phases of SPS WCP handed over to AFCD only)		<b>√</b>	<b>✓</b>	-
10.11.3.13 & 10.11.3.26	Non-DPs	Trash Fish Stocking Stocking shallow ponds with small fish provides a high-quality feeding resource for many species of bird and other fish-eating species and may be considered as an additional measure to achieve higher enhancement value). This measure will be derived as needed to further enhance the functional value of the ponds.	Enhanced Compensatory Wetland within the proposed SPS WCP / Construction and Operation Phase	AFCD (within completed phases of SPS WCP handed over to AFCD only)		✓	√	-
10.11.3.28 - 10.11.3.34	Non-DPs	Enhanced Wetland for Other Freshwater Wetland Habitats Under the current wetland enhancement strategy, about 35 ha of "enhanced freshwater wetland habitats" shall also be established within the	Enhanced Wetland within the proposed SPS WCP / Construction and Operation Phase	Construction phase: AFCD as project proponent of SPS WCP; CEDD as works agent		<b>√</b>	✓	• EIAO-TM

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		proposed SPS WCP, alongside the compensation of "ecologically enhanced fishponds".  The "enhanced freshwater wetland habitats" would be designed to compensate for impacts on a like-for-like basis as far as practicable, and could include various habitat types that would support communities currently utilising impacted freshwater habitats:  Ducks and Grebes;  Freshwater Wetland Avifauna;  Other Wetland-associated Avifauna Species;  Eurasian Otters; and  Other Non-Avifaunal Species of Conservation Interest Details on the habitat requirement of these species are provided in Section 10 of the EIA report, and in the subsequent HCMP.  Details on the habitat requirement of these species are provided in Section 10 of the EIA report, and in the subsequent HCMP.  Disturbance impact from the Project is anticipated to result in EZ and RDZ along the Project boundary, which is expected to support lower densities of disturbance sensitive of wildlife, in particular avifauna species. As the species recorded in marsh / reed habitats tend to be less disturbance-sensitive than species utilizing more open wetland habitats, the proposed "enhanced freshwater wetland habitats" could be considered along these EZ and RDZ, where the remaining areas of the proposed SPS WCP (outside the EZ and RDZ) can be maximised for ecologically enhanced fishponds.		Operation phase: AFCD (within completed phases of SPS WCP handed over to AFCD only)				

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*		•			Relevant Legislation

		Upon the establishment of the proposed SPS WCP, it could be able to accommodate the aforementioned enhanced wetland of about 288 ha (253 ha of "ecologically enhanced fishponds" and 35 ha of "enhanced freshwater wetland habitats"). The Government will enhance the ecological function and capacity of 288 ha of wetlands in the proposed SPS WCP with active conservation management to compensate for the loss in wetland arising from the development of San Tin Technopole, which would create sufficient environmental capacity to support the compensation requirement of the Project.								
10.11.3.35	Non-DPs	Habitat Creation and Management Plan (HCMP) Details of the "ecologically enhanced fishponds" and "enhanced freshwater wetland habitat", including detailed design of habitats, habitat requirement for the aforementioned target species, details of management practices, implementation details, as well as the monitoring requirements (e.g., monitoring period, location, frequency, parameters, and target levels), will be provided in the subsequent HCMP. The HCMP should be submitted for approval from relevant Government departments (including AFCD and EPD), at least three months before the commencement of pond filling works.	Enhanced Wetland within the proposed SPS WCP / Design Phase	Design phase: Project Proponent, in consultation with AFCD (as project proponent) and CEDD (as works agent) of SPS WCP	<b>√</b>			-		
10.11.3.36	Non-DPs	Minimising Construction Phase Indirect Impacts on Sites of Conservation Importance and Associated Habitats	Project site / Design and Construction Phase	Project Proponent / Design stage consultant / Contractor	<b>√</b>	<b>√</b>		-		

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	_	Implementation Stage*		Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	C	O	Relevant Legislation & Guidelines
		Phasing of pond filling works in San Tin – Sam Po Shue area should be adopted. The pond filling works will be phased to tie in with the phased development of the SPS WCP, with a working group formed to coordinate the progress of pond filling and SPS WCP implementation. The pond filling works should also be started from urbanised area towards the wider wetland area (i.e. from the southeast near STEMDC or San Tin Highway towards the northwest) and construction activities should be minimised at any one time, so as to allows gradual migration of wildlife to the wetland habitats northwest to the Project area. Pond filling works should also be conducted in wet season as far as possible when there is a lower abundance of avifauna. In order to reduce the scale of disturbance and the total area of pond filling at the same time, filling of ponds in San Tin / Sam Po Shue should be conducted in multiple wet seasons (at least 2 years or more).						
10.11.3.37	Non-DPs	Minimising Construction Phase Indirect Impacts on Sites of Conservation Importance and Associated Habitats  Site hoarding of about 3 m high should be erected along the works site and works area before commencement of construction activities, to shield the avifauna in the nearby wetlands from the disturbance of human activities during construction phase. Such hoarding would be nontransparent and superimposing dark patterns or stripes to avoid the risk of potential bird collision.	Project site / Construction Phase	Contractor		✓		-

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	-	ementa Stage*		Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
10.11.3.38	Non-DPs	Minimising Construction Phase Indirect Impacts via the establishment of an "Eco-Interface"  Under the Revised RODP, an "eco-interface" area with width of about 35 m was proposed along the northwest of the Project boundary, between the proposed Project area in San Tin and the wider pond habitats in San Tin and Sam Po Shue; while another "eco-interface" area with width of about 20 m was also proposed along the east of STEMDC, creating a buffer between the "OU(I&T)" land use and the watercourse STEMDC. The "eco-interface" would be established in the form of a landscape buffer via landscape planting, comprising native tree species, shrub mix and riparian vegetation, and incorporating a gentle slope interface, with an aim to minimise disturbance from Project area by providing a buffer between the development and the adjacent wetland habitats and associated fauna.	Project site / Design and Construction Phase	Design stage consultant / Contractor	✓	1		
10.11.3.39 - 10.11.3.41	Non-DPs	Wetland Enhancement Measure Together with the development of the Project, enhancement measures would also be implemented to enhance the ecological value of wetland habitats in the Deep Bay area. Two management issues at Mai Po Inner Deep Bay Ramsar Site could be addressed to enhance environmental capacity across the broader North West New Territories (NWNT) wetland system:  Firstly, tidal channels that link gei wai in the Mai Po Nature Reserve to the Inner Deep Bay have become silted up over time, limiting	Off-site enhancement area / Construction and Operation Phase	Project Proponent / Contractor	1	1	✓	

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		tidal exchange and degrading the function of habitats within the gei wai. Improvement of these channels via de-silting can promote tidal exchange and enhance habitat condition within the gei wai.  Secondly, the invasive exotic mangrove Sonneratia sp. has spread rapidly across mudflat habitats and drainage channels across the NWNT. Selective clearance of larger Sonneratia stands can help restore wetland habitats in affected areas.  Realising the beneficial effects brought by the enhancement measures, they are targeted to be commenced as early as possible. Both enhancement measures shall be undertaken in the wet season (April – September) to minimise disturbance impacts to overwintering avifauna and hence they are proposed to be commenced earliest at the start of the 2025 wet season. Details of the enhancement measures (e.g. details, timeframe and requirement/frequency of repetition for the enhancement works) shall be provided in a separate work plan prepared by the project proponent, and submitted to AFCD for agreement at least three months prior to the commencement of these works.						
10.11.3.42 - 10.11.3.44	Non-DPs	Improvement of Tidal Channel Selected tidal channels could be de-silted. These channels connect to the sluice-gates of several existing <i>gei wai</i> , where proposed de-silting works could potentially enhance the functioning of <i>gei</i>	Off-site enhancement area / Construction and Operation Phase	Project Proponent / Contractor	<b>√</b>	✓	✓	-

10.11.4.3 - 10.11.4.4		The Revised RODP of the Project was carefully designed with the aim to preserve the MPLV Egretry, and the vegetation currently used by the breeding ardeids. An "Open Space" is currently proposed to preserve the core area of the egretry and the vegetation. Detailed design of this "Open Space" shall incorporate enhancement features, which may include:  • Preservation of trees currently within the core area of the MPLV Egretry;  • Incorporation of water features within the "Open Space" area, adjacent to the existing of MPLV Egretry;  • Planting of mature trees adjacent to the water features, with native species that are currently used as egretry substratum; and  • Maintaining a buffer area between the water features and the established mature trees from the adjacent proposed land-uses (e.g. logistics storage and workshop, district cooling system, and traffic roads).  The enhancement measures would be established during the construction phase. Buffer planting along the Open Space could also minimise potential indirect disturbance impacts on the egretry from adjacent proposed land-use and traffic network during operation phase. Under the proposed "Open Space", only low intensity activities would be allowed (e.g. plant nursery), while other recreational activities (e.g. sports and recreation) would not be included in the "Open	Design and Construction Phase	consultant / Contractor				

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Timing of	Implementation	Implementation Stage*			Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	C	0	& Guidelines
		Space" in order to minimise the disturbance to the MPLV Egretry.  A pre-construction surveys are necessary to confirm the latest boundary and condition MPLV Egretry before commencement of the construction works. Any construction activities within the 100 m distance of the egretry (subject to findings of pre-construction survey) should be subject to seasonal control.  An Egretry Habitat Enhancement and Management Plan including the details of design plan, site preparation works, works schedule and management plan should be prepared for approval from relevant Government departments (including EPD and AFCD) before the commencement of construction works.  Maintenance of enhancement features suggested above (e.g. preservation and planting of egretry substratum, incorporation of water features, and maintaining buffer area) shall be implemented during the period of egretry monitoring.						
10.11.4.10 - 10.11.4.12	DP1, DP7 of EIA Report, Non-DPs	Minimising Construction Phase Impacts on  Egretries  Considering the close proximity between the proposed development and both MPLV Egretry and MPV Egretry, encroachment into the trees at both egretries shall be strictly avoided during construction phase (except for the minor encroachment of the MPLV egretry). The latest boundary, condition, flight paths of both MPLV Egretry and MPV Egretry and the associated	Construction sites in the vicinity of the egretries / Design and Construction Phase	Design stage consultant / Contractor	<b>√</b>	✓		Guidelines for Planning and Carrying out Construction Works at Egretries

		March) to minimise indirect impacts. Prior to the tree removal at the existing roosting site, noisy construction activities within 100 m of the existing San Tin Open Storage Area Night Roost would be subject to timing control during dry season (October to March) to minimise indirect disturbance impacts; while upon the tree removal (and the re-provision of roosting substratum along the revitalised STWMDC), the same timing control would be implemented within 100 m of the re-provided night roost. During dry season (October to March), noisy construction activities (with the use of PME) within the 100 m Buffer Area should cease at least an hour before sunset, and shall commence at least an hour after sunrise on the following day, making reference to the time of sunrise and sunset from the Hong Kong Observatory. Monitoring of the re-provided roosting sites (e.g. conditions of the re-provided tree individuals) shall also be conducted, with maintenance conducted by the Project Proponent and Contractor during the period of night roost monitoring.						
10.11.5.1 - 10.11.5.8		Minimising Construction Phase Direct / Indirect Impacts on Night Roost The construction activities and tree felling in Ha Wan Tsuen Night Roost and San Tin Open Storage Area Night Roost should be allowed only in wet season (April – September) which no roosting individual was recorded in current survey. Re- provision planting of the roosting substratum both	Construction sites, existing night roosts, and re-provision roosting area / Construction Phase	Design stage consultant / Contractor	<b>√</b>	✓		_

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation	Implementation Stage*			Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	Des C	O	a dulucinies
		night roosts should also be commenced as early as possible before the commencement of construction activities that may result in the loss of both night roosts.  In the case where construction activities or temporary works cannot be avoided during the overwintering season, As discussed above, in the case where construction activities or temporary works near the re-provided night roosts cannot be avoided during the overwintering season (October to March), noisy construction works within 100 m of the existing night roosts (prior to tree felling) and re-provided night roosts (upon re-provision) (exact area would be subject to the preconstruction survey finding and detailed design in the future) should cease before the peak returning time (an hour before sunset) of the ardeids and Great Cormorants, and shall commence at least an hour after sunrise on the following day, making reference to the time of sunrise and sunset from the Hong Kong Observatory.  Monitoring of the re-provided roosting sites (e.g. conditions of the re-provided tree individuals) shall also be conducted, with maintenance conducted by the Project Proponent and Contractor during the period of night roost monitoring.						
10.11.6.1 - 10.11.6.3	Non-DPs	Impact on Flight Paths: MPLV Egretry A Non-Building Area (NBA) of about 70 m wide is proposed to the northwest from the existing MPLV	Construction sites / Design and Construction Phase	Design stage consultant / Contractor	<b>√</b>	<b>√</b>		-

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation Agent	Implementation Stage*			Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	С	O	a datacinics
		Egretry. Under the Project, obstruction of flight paths will also be further minimised by maintaining flight corridors along the proposed Road D3, allowing connection of flights between the MPLV and the diverted WC-N8 located towards the northeast, and along the proposed Road L11 towards the west. No tall structures are anticipated above the proposed Road D3 and Road L11, thus expected to allow flight to and from the MPLV Egretry, partially coinciding with the observed Flight Paths. Heights of associated structures on these corridors shall be limited in order to allow flight movement.  In order to minimize the disturbance on the flight path along the NBA during breeding period of the egretry (i.e. from March to early September) and encourage ardeid usage, the noisy construction works (with the use of PME) within the 70 m wide NBA should cease at least an hour before sunset, and shall commence at least two hours after sunrise on the following day, making reference to the time of sunrise and sunset from HKO), to avoid the period of highest utilisation of flight path.  Further disturbances shall be minimised along the proposed flight paths, by incorporation of greening features of suitable heights, where appropriate, to minimise visual disturbance on the ardeids from human activities and further encourage flight usage.

	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		activities should be neutralised to within the pH range of 6 to 10 before discharging into foul sewers. If there is no public foul sewer in the vicinity, the neutralised wastewater should be tankered off site for disposal into foul sewers or treated to a standard acceptable to storm drains and the receiving waters;  • The Waste Disposal Ordinance (Cap 354) and its subsidiary regulations in particular the Waste Disposal (Chemical Waste) (General) Regulation, should be observed and complied with for control of chemical wastes. The Contractor is also recommended to develop management procedures for chemicals used and prepare an emergency spillage handling procedure to deal with chemical spillage in case of accidents.						
11.7.2.3 - 11.7.2.4	Non-DPs	Fisheries Compensation Requirement and Location The requirement of fisheries compensation mainly arises from the direct permanent loss of active fishponds (which support existing aquaculture activities and production), and the permanent loss of inactive fishponds (with potential value to support future aquaculture activities upon conversion). The Government will introduce a suite of mitigation measures to enhance the fisheries resources (e.g. fisheries activities and production, culture area and aquaculture potential etc.) of the proposed SPS WCP with a view to compensate for the loss of fishponds arising from	Fisheries compensation area within the proposed SPS WCP / Construction and Operation Phase	Construction phase: AFCD as project proponent of SPS WCP; CEDD as works agent Operation phase: AFCD		<i>J</i>	<i>J</i>	• EIAO-TM

EIA Ref.	Relevance to Designated	Environmental Protection Measures	Location / Duration of Measures / Timing of	Implementation Agent	_	lementa Stage*	ation	Relevant Legislation & Guidelines
	Project (DP)		Completion of Measures	Agent	Des	С	O	& Guidelines
		the development of the San Tin Technopole as well as making an overall improvement to the utilisation of fisheries resources for aquaculture and promoting sustainable development of the industry in the long run. The Government will enhance the fisheries resources of 40 ha of land in the SPS WCP, including incorporation of modernised aquaculture, to compensate for the loss in fisheries resources arising from the development of San Tin Technopole.  The Government will reserve 40 ha of land in the proposed SPS WCP as a fisheries enhancement area, in which the fisheries resources will be enhanced by incorporation of modernised aquaculture and proper planning and management of aquaculture activities therein. The fisheries enhancement area shall be delineated separately from the "ecologically enhanced fishponds", of which the purpose would conflict with aquaculture activities for food fish production since the "ecologically enhanced fishponds" mainly serve to provide ecological enhancement and attract foraging birds and other wildlife.						
11.7.2.10 - 11.7.2.11	Non-DPs	Establishing the AFCD Fisheries Research Centre Proper technical support would ensure the proper implementation of these practices to enhance actual fisheries aquaculture production. As such, under the Project, an AFCD Fisheries Research Centre shall be established at a location near the Loop to bridge the technical gap by providing	OU(I&T)6 site in the northern portion of the Project area, southwest to the Loop / Construction and Operation Phase	Construction phase: AFCD as project proponent of Fisheries Research Centre; CEDD as works agent		<b>√</b>	<b>√</b>

Project	(DP)		Completion of Measures	Agent	Des	С	O	Relevant Legislation & Guidelines		
		support to the modernised aquaculture that is currently practised only in a limit extent in Hong Kong. Details of layout and design are subject to AFCD's approval on the site requirement in the design and construction stage.  The proposed AFCD Fisheries Research Centre shall be implemented with accorded priority under the initial phase of the Project, for it is indispensable in serving a vital role in the provision of mitigation measures by promoting modernised aquaculture, conducting aquaculture research, and transferring modernised aquaculture techniques to local fish farms, thus facilitating the transformation and upgrading of the industry through technological advancement and improving aquaculture activities in the area. Furthermore, the proposed AFCD Fisheries Research Centre would be implemented under the initial phase of the Project, while the majority of the fishpond loss in San Tin and Sam Po Shue would occur during the main phase of the Project (refer to Appendix 2.1 for development phasing plan). With the early establishment of the Fisheries Research Centre, early enhancement of aquaculture production and activities would be possible, thus minimising fisheries impact before the establishment of fisheries enhancement area in the proposed SPS WCP.		Operation phase: AFCD

ANNEX J

STATUS OF EP SUBMISSIONS

#### ANNEX J EP SUBMISSIONS

#### RELEVANT SUBMISSIONS FOR EP-640/2024 (SAN TIN/LOK MA CHAU WATER RECLAMATION PLANT)

EP Condition	Relevant Requirement/ Submission	Phase	Required Timeframe	Submission Status
2.1	Establishment of Environmental Team (ET)	Before commencement of construction	No later than 2 months before the commencement of construction of corresponding parts of the Project	Established on 04 June 2025
2.6	Employment of Independent Environmental Checker (IEC)	Before commencement of construction	No later than 2 months before the commencement of construction of corresponding parts of the Project	Established on 13 June 2025
2.10	EP Submission Schedule	Before commencement of construction	No later than 1 month before the commencement of construction of the Project	Submitted to EPD on 13 August 2025
2.11	Management Organization	Before commencement of construction	No later than 1 month before the commencement of construction of the Project	Submitted to EPD on 28 August 2025
2.12	Construction Noise Management Plan (CNMP)	Before commencement of construction	No later than 2 months before the commencement of construction of the Project	Submitted to EPD on 28 July 2025, EPD comments received on 26 August 2025
2.14	Landscape and Visual Mitigation Plan(s) (LVMP(s))	Before commencement of construction	No later than 2 months before the implementation of the corresponding parts of landscape and visual mitigation measures of the Project	N/A
2.15	Tree Compensatory Planting Implementation Plan (TCPP) for DP3 (Water Reclamation Plant)	Before commencement of construction	No later than 2 months before the commencement of construction of corresponding parts of the Project involving tree felling works	Submitted to EPD on 8 September 2025
2.16	Supplementary Contamination Assessment(s) / Contamination Assessment Report(s) / Remediation Action Plan(s)	Before commencement of construction	No later than 2 months before the commencement of site investigation (SI) at the concerned facilities/areas	N/A

EP Condition	Relevant Requirement/ Submission	Phase	Required Timeframe	Submission Status
2.18	Commissioning Test Plan	Before operation	No later than 6 months before the commencement of operation of the Project	N/A
2.19	Commissioning Test Report	Before operation	No later than 1 month before the commencement of operation of the Project	N/A
3.3	Baseline Noise Monitoring Report	Before commencement of construction	At least 2 weeks before the commencement of construction of corresponding parts of the Project	Resubmitted to EPD on 27 October 2025
	Baseline Water Quality Monitoring Report			Submitted to EPD on 15 September 2025
3.4	Monthly EM&A Reports	During construction	Within 10 working days after the end of the reporting month	Submitted by ET monthly
4.2	Dedicated Internet Website	During construction	Within 4 weeks after the commencement of construction of the Project	CEDD notified EPD a dedicated internet website will setup for the environmental monitoring data and project information on 30 October 2025.

### RELEVANT SUBMISSIONS FOR EP-641/2024 (SAN TIN/LOK MA CHAU EFFLUENT POLISHING PLANT)

EP Condition	Relevant Requirement/ Submission	Phase	Required Timeframe	Submission Status
2.1	Establishment of Environmental Team (ET)	Before commencement of construction	No later than 2 months before the commencement of construction of corresponding parts of the Project	Established on 04 June 2025
2.6	Employment of Independent Environmental Checker (IEC)	Before commencement of construction	No later than 2 months before the commencement of construction of corresponding parts of the Project	Established on 13 June 2025

EP Condition	Relevant Requirement/ Submission	Phase	Required Timeframe	Submission Status	
2.10	EP Submission Schedule	Before commencement of construction	No later than 1 month before the commencement of construction of the Project	Submitted to EPD on 13 August 2025	
2.11	Management Organization	Before commencement of construction	No later than 1 month before the commencement of construction of the Project	Submitted to EPD on 28 August 2025	
2.12	Construction Noise Management Plan (CNMP)	Before commencement of construction	No later than 2 months before the commencement of construction of the Project	Submitted to EPD on 28 July 2025, EPD comments received on 26 August 2025	
2.14	Landscape and Visual Mitigation Plan(s) (LVMP(s))	Before commencement of construction	No later than 2 months before the implementation of the corresponding parts of landscape and visual mitigation measures of the Project	N/A	
2.15	Tree Compensatory Planting Implementation Plan (TCPP) for DP2 (Effluent Polishing Plant)	Before commencement of construction	No later than 2 months before the commencement of construction of corresponding parts of the Project involving tree felling works	Submitted to EPD on 28 July 2025
